ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for lexA. It may not necessarily be applicable to this product.

NCBI GI #	500227279
NCBI Accession #	WP_011897372.1
UniProt Primary Accession #	A4QET8
GenBank Nucleotide #	WP_011897372.1
NCBI Official Full Name	LexA repressor
UniProt Protein Name	LexA repressor

Protein Family	LexA repressor
UniProt Gene Name	lexA
UniProt Comments for lexA	Represses a number of genes involved in the response to DNA damage (SOS response), including recA and lexA. In the presence of single-stranded DNA, RecA interacts with LexA causing an autocatalytic cleavage which disrupts the DNA-binding part of LexA, leading to derepression of the SOS regulon and eventually DNA repair.
