Other Notes	Small volumes of fmt recombinant protein vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for fmt. It may not necessarily be applicable to this product.

NCBI GI #	259646042
NCBI Accession #	A0QI16.1
UniProt Primary Accession #	A0QI16
NCBI Official Full Name	Methionyl-tRNA formyltransferase
UniProt Protein Name	Methionyl-tRNA formyltransferase
Protein Family	Clustered mitochondria protein

UniProt Gene Name	fmt
UniProt Comments for fmt	Attaches a formyl group to the free amino group of methionyl-tRNA(fMet). The formyl group appears to play a dual role in the initiator identity of N-formylmethionyl-tRNA by promoting its recognition by IF2 and preventing the misappropriation of this tRNA by the elongation apparatus.
