Capsid Protein (C) Artic Squirrel Hepatitis Virus Recombinant Protein

PRODUCT OVERVIEW

Product Name	Capsid protein (C), Recombinant Protein
Full Product Name	Recombinant Artic squirrel hepatitis virus Capsid protein (C)
Product Gene Name	C recombinant protein
Product Synonym Gene Name	C
Sequence	MDIDPYKEFG SSYQLLNFLP LDFFPELNAL VDTATALYEE ELTGREHCSP HHTAIRQALV CWEELTRLIA WMSANINSEE VRRVIVAHVN DTWGLKVRQN LWFHLSCLTF GQHTVQEFLV SFGVRIRTPA PYRPPNAPIL STLPEHTVIR RRGSARVVRS PRRRTPSPRR RRSQSPRRRP QSPASNC
Host	E Coli or Yeast or Baculovirus or Mammalian Cell
Form/Format	Lyophilized or liquid (Format to be determined during the manufacturing process)
Purity/Purification	Greater or equal to 85% purity as determined by SDS-PAGE. (lot specific)
Preparation and Storage	Store at -20 degrees C. For long-term storage, store at -20 degrees C or -80 degrees C. Store working aliquots at 4 degrees C for up to one week. Repeated freezing and thawing is not recommended.
Molecular Weight	25,097 Da
Sequence Positions	1-187, Full length protein
Tag Information	This protein contains an N-terminal tag and may also contain a C-terminal tag. Tag types are determined by various factors including tag-protein stability, please inquire for tag information.
Sterility	Sterile filter available upon request.
Endotoxin	Low endotoxin available upon request.
3D Structure	ModBase 3D Structure for Q64897
Species	Artic squirrel hepatitis virus (ASHV)
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Related Product Information for C recombinant protein	MBS1311360 is a recombinant protein targeting C. Also known as Recombinant Artic squirrel hepatitis virus Capsid protein (C). Host: E Coli or Yeast or Baculovirus or Mammalian Cell.
Other Notes	Small volumes of C recombinant protein vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for C. It may not necessarily be applicable to this product.

NCBI GI #	81934951
NCBI Accession #	Q64897.1
UniProt Primary Accession #	Q64897
NCBI Official Full Name	Capsid protein
UniProt Protein Name	Capsid protein
UniProt Synonym Protein Names	Core antigen

Protein Family	Capsid assembly protease
UniProt Gene Name	C
UniProt Comments for C	Self assembles to form an icosahedral capsid. Most capsid appear to be large particles with a icosahedral symmetry of T=4 and consist of 240 copies of capsid protein, though a fraction forms smaller T=3 particles consisting of 180 capsid proteins. Entering capsid are transported along microtubules to the nucleus. Phosphorylation of the capsid is thought to induce exposure of nuclear localization signal in the C-terminal portion of the capsid protein that allows binding to the nuclear pore complex via the importin (karyopherin-) alpha and beta. Capsids are imported in intact form through the nuclear pore into the nuclear basket, where it probably binds NUP153. Only capsids that contain the mature viral genome can release the viral DNA and capsid protein into the nucleoplasm. Immature capsids get stucked in the basket. Capsids encapsulate the pre-genomic RNA and the P protein. Pre-genomic RNA is reverse transcribed into DNA while the capsid is still in the cytoplasm. The capsid can then either be directed to the nucleus, providing more genome for transcription, or bud through the endoplasmic reticulum to provide new virions.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
