Chaperone Protein Dnaj (dnaJ) Gluconobacter Oxydans Recombinant Protein

PRODUCT OVERVIEW

Product Name	Chaperone protein DnaJ (dnaJ), Recombinant Protein
Full Product Name	Recombinant Gluconobacter oxydans Chaperone protein DnaJ (dnaJ)
Product Gene Name	dnaJ recombinant protein
Product Synonym Gene Name	dnaJ
Sequence	MATRIDYYES LEVSRTASQD ELKKAFRKQA MRYHPDRNPG DDAAEQKFKE INEAYDVLKD EQKRAAYDRY GHDAFEGGMG GMGGGFGGGF AGAGGLGDIF DQMFGDMMGG RRDGGRRTGA DVQVQVEITL MEAFTGVTKD VEVRTRVTCE ACHGSGSADP KAGSSTCPTC HGAGKVRAQQ GFFLVERPCP TCHGSGRTVA NPCKVCHGTG TEAKTETISI DIPAGVEDGT RIRMAGKGEA GGEGVQPGDL YVHISVLSHD IFQRDGANIY CRVPLRMTQA ALGTEVEVPV VDGGRSKVRI PAGTQTGETF RLRGKGFSVL RSSARGDMYI QVSVETPSHL TKRQRELLEE FEKEAGDDHA KGSPENSGFF AKVRDFFEGR
Host	E Coli or Yeast or Baculovirus or Mammalian Cell
Form/Format	Lyophilized or liquid (Format to be determined during the manufacturing process)
Purity/Purification	Greater or equal to 85% purity as determined by SDS-PAGE. (lot specific)
Preparation and Storage	Store at -20 degrees C. For long-term storage, store at -20 degrees C or -80 degrees C. Store working aliquots at 4 degrees C for up to one week. Repeated freezing and thawing is not recommended.
Molecular Weight	41,026 Da
Sequence Positions	1-380, Full length protein
Tag Information	This protein contains an N-terminal tag and may also contain a C-terminal tag. Tag types are determined by various factors including tag-protein stability, please inquire for tag information.
Sterility	Sterile filter available upon request.
Endotoxin	Low endotoxin available upon request.
3D Structure	ModBase 3D Structure for Q5FSL4
Species	Gluconobacter oxydans (strain 621H) (Gluconobacter suboxydans)
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Related Product Information for dnaJ recombinant protein	MBS1484872 is a recombinant protein targeting dnaJ. Also known as Recombinant Gluconobacter oxydans Chaperone protein DnaJ (dnaJ). Host: E Coli or Yeast or Baculovirus or Mammalian Cell.
Other Notes	Small volumes of dnaJ recombinant protein vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for dnaJ. It may not necessarily be applicable to this product.

NCBI GI #	499571645
NCBI Accession #	WP_011252428.1
UniProt Primary Accession #	Q5FSL4
GenBank Nucleotide #	WP_011252428.1

NCBI Official Full Name	molecular chaperone DnaJ
UniProt Protein Name	Chaperone protein DnaJ
Protein Family	Chaperone protein
UniProt Gene Name	dnaJ
UniProt Comments for dnaJ	Participates actively in the response to hyperosmotic and heat shock by preventing the aggregation of stress-denatured proteins and by disaggregating proteins, also in an autonomous, DnaK-independent fashion. Unfolded proteins bind initially to DnaJ; upon interaction with the DnaJ-bound protein, DnaK hydrolyzes its bound ATP, resulting in the formation of a stable complex. GrpE releases ADP from DnaK; ATP binding to DnaK triggers the release of the substrate protein, thus completing the reaction cycle. Several rounds of ATP-dependent interactions between DnaJ, DnaK and GrpE are required for fully efficient folding. Also involved, together with DnaK and GrpE, in the DNA replication of plasmids through activation of initiation proteins.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
