Deoxyribonucleic Protein Antibody, DNP-Ab (DNP-Ab) ELISA Kit for Human

PRODUCT OVERVIEW

Product Name	deoxyribonucleic protein antibody, DNP-Ab, ELISA Kit
Full Product Name	Human deoxyribonucleic protein antibody, DNP-Ab ELISA Kit
Product Gene Name	DNP-Ab elisa kit
Species Reactivity	Human
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Detection Range	1ng/ml - 400ng/ml
Sensitivity	0.53ng/ml
Preparation and Storage	Store at 2 to 8 degree C for 6 months.
Intra-Assay	CV<8%
Inter-Assay	CV<10%
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Related Product Information for DNP-Ab elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of human Deoxyribonucleic Protein Antibody (also known as DNP-Ab) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human DNP-Ab antibody. DNP-Ab present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human DNP-Ab Antibody is added and binds to DNP-Ab in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated DNP-Ab antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human DNP-Ab. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
Other Notes	Small volumes of DNP-Ab elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for DNP-Ab purchase	MBS160844 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the deoxyribonucleic protein antibody, DNP-Ab, ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing DNP-Ab. The ELISA analytical biochemical technique of the MBS160844 kit is based on DNP-Ab antibody-DNP-Ab antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect DNP-Ab antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, DNP-Ab. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).

Typical Testing Data/Standard Curve (for reference only) of DNP-Ab elisa kit

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
