Cyclin D1 (CCND1) ELISA Kit for Human

PRODUCT OVERVIEW

Product Name	Cyclin D1 (CCND1), ELISA Kit
Full Product Name	Human Cyclin D1 (CCND1) ELISA Kit
Product Gene Name	CCND1 elisa kit
Species Reactivity	Human
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Detection Range	0.5ng/ml - 60ng/ml
Sensitivity	0.29ng/ml
Preparation and Storage	Store at 2 to 8 degree C for 6 months.
Molecular Weight	13,986 Da
3D Structure	ModBase 3D Structure for Q9H014
Intra-Assay	CV<8%
Inter-Assay	CV<10%
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Related Product Information for CCND1 elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of human Cyclin D1 (also known as CCND1) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human CCND1 antibody. CCND1 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human CCND1 Antibody is added and binds to CCND1 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated CCND1 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human CCND1. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
Other Notes	Small volumes of CCND1 elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for CCND1 purchase	MBS166931 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Cyclin D1 (CCND1) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing CCND1. The ELISA analytical biochemical technique of the MBS166931 kit is based on CCND1 antibody-CCND1 antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect CCND1 antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, CCND1. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).

Typical Testing Data/Standard Curve (for reference only) of CCND1 elisa kit

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for CCND1. It may not necessarily be applicable to this product.

NCBI GI #	11414805
NCBI Accession #	CAA54800.1
UniProt Primary Accession #	Q9H014
NCBI Official Full Name	cyclin D1, partial
UniProt Protein Name	Cyclin D1
UniProt Synonym Protein Names	Cyclin D1
Protein Family	G1/S-specific cyclin
UniProt Gene Name	cyclin D1
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
