Dc Specific Intercellular Adhesion Molecule 3-Grabbing Nonintegrin, Dc-SIGN/CD209 (DC-SIGN/CD209) ELISA Kit for Human

PRODUCT OVERVIEW

Product Name	DC specific intercellular adhesion molecule 3-grabbing nonintegrin, DC-SIGN/CD209, ELISA Kit
Full Product Name	Human DC specific intercellular adhesion molecule 3-grabbing nonintegrin, DC-SIGN/CD209 ELISA Kit
Product Gene Name	DC-SIGN/CD209 elisa kit
Species Reactivity	Human
Preparation and Storage	Store at 2 to 8 degree C for 6 months.
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Related Product Information for DC-SIGN/CD209 elisa kit	MBS167840 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the DC specific intercellular adhesion molecule 3-grabbing nonintegrin, DC-SIGN/CD209, ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing DC-SIGN/CD209. The ELISA analytical biochemical technique of the MBS167840 kit is based on DC-SIGN/CD209 antibody-DC-SIGN/CD209 antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect DC-SIGN/CD209 antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, DC-SIGN/CD209. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of DC-SIGN/CD209 elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
