Apotransferrin (apoTf) ELISA Kit for Human

PRODUCT OVERVIEW

Product Name	Apotransferrin (apoTf), ELISA Kit
Full Product Name	Human Apotransferrin (apoTf) Mini Samples ELISA Kit
Product Gene Name	apoTf elisa kit
Product Synonym Names	apo-Transferrin; Apo-Tf
Species Reactivity	Human
Assay Type	Double-antibody Sandwich ELISA for Antigen Detection
Samples	Serum, plasma, Tissue homogenates, cell culture supernates and other biological fluids.
Detection Range	0.156-10ng/mL
Sensitivity	0.066ng/mL
Supply Chain Verification	Manufactured in a lab with traceable raw materials. Bulk orders can typically be prepared to the customer's specifications, please inquire.
ISO Certification	Manufactured in an ISO 9001:2015 and ISO 13485:2016 Certified Laboratory.
Related Product Information for apoTf elisa kit	MBS2087920 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Apotransferrin (apoTf) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing apoTf. The ELISA analytical biochemical technique of the MBS2087920 kit is based on apoTf antibody-apoTf antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect apoTf antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, apoTf. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of apoTf elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
