Runt Related Transcription Factor 1 (RUNX1) Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	Runt Related Transcription Factor 1 (RUNX1), Polyclonal Antibody
Full Product Name	PE-Linked Polyclonal Antibody to Runt Related Transcription Factor 1 (RUNX1)
Product Gene Name	anti-RUNX1 antibody
Product Synonym Names	AML1; AMLCR1; CBFA2; EVI-1; PEBP2aB; Acute Myeloid Leukemia 1; Aml1 Oncogene; Core-binding factor subunit alpha-2; Polyomavirus enhancer-binding protein 2 alpha B subunit
Immunogen Sequence	Met1~Phe23 2
Clonality	Polyclonal
Host	Rabbit
Species Reactivity	Human, Mouse, Rat
Form/Format	Liquid; 0.01M PBS, pH7.4, containing 0.05% Proclin-300, 50% glycerol.
Purity/Purification	Antigen-specific affinity chromatography followed by Protein A affinity chromatography
Concentration	>=100ug/ml (lot specific)
Specificity	The antibody is a rabbit polyclonal antibody raised against RUNX1. It has been selected for its ability to recognize RUNX1 in immunohistochemical staining and western blotting.
Preparation and Storage	Store at 4 degree C for frequent use. Aliquot and store at -20 degree C for 12 months. Avoid repeated freeze/thaw cycles. The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37 degree C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.
Matching Pairs	Unconjugated Antibody: RUNX1 (MBS2112328) PE Conjugated Antibody: RUNX1 (MBS2118909)
Matching Pairs	PE Conjugated Antibody: RUNX1 (MBS2118909) Immunogen: RUNX1 (MBS2034562)
Molecular Weight	48,737 Da
Chromosome Location	Chromosome: 21; NC_000021.8 (36160098..36421595, complement). Location: 21q22.3
OMIM	151385
3D Structure	ModBase 3D Structure for Q01196
Supply Chain Verification	Manufactured in a lab with traceable raw materials. Bulk orders can typically be prepared to the customer's specifications, please inquire.
Immunogen Sequence	Met1~Phe232
Cross Reactivity	Human
Conjugation	PE
Product Categories/Family for anti-RUNX1 antibody	Signal Transduction
ISO Certification	Manufactured in an ISO 9001:2015 and ISO 13485:2016 Certified Laboratory.

Applications Tested/Suitable for anti-RUNX1 antibody	Western Blot (WB), Immunohistochemistry (IHC), Immunocytochemistry (ICC), Immunoprecipitation (IP)
Related Product Information for anti-RUNX1 antibody	MBS2118909 is an antibody targeting RUNX1. Also known as PE-Linked Polyclonal Antibody to Runt Related Transcription Factor 1 (RUNX1). Reactive in Human, Mouse, Rat. Host: Rabbit.
Other Notes	Small volumes of anti-RUNX1 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for RUNX1. It may not necessarily be applicable to this product.

NCBI GI #	49574546
NCBI GeneID	861
NCBI Accession #	NP_001001890.1
UniProt Primary Accession #	Q01196
UniProt Secondary Accession #	O60472; O60473; O76047; O76089; Q13081; Q13755; Q13756; Q13757; A8MV94; B2RMS4; D3DSG1
UniProt Related Accession #	Q01196
GenBank Nucleotide #	NM_001001890.2
NCBI Official Full Name	runt-related transcription factor 1 isoform AML1b
NCBI Official Synonym Full Names	runt-related transcription factor 1
NCBI Official Symbol	RUNX1
NCBI Official Synonym Symbols	AML1; CBFA2; EVI-1; AMLCR1; PEBP2aB; AML1-EVI-1
UniProt Protein Name	Runt-related transcription factor 1
UniProt Synonym Protein Names	Acute myeloid leukemia 1 protein; Core-binding factor subunit alpha-2; CBF-alpha-2; Oncogene AML-1; Polyomavirus enhancer-binding protein 2 alpha B subunit; PEA2-alpha B; PEBP2-alpha B; SL3-3 enhancer factor 1 alpha B subunit; SL3/AKV core-binding factor alpha B subunit
Protein Family	Runt-related transcription factor
UniProt Gene Name	RUNX1
UniProt Synonym Gene Names	AML1; CBFA2; CBF-alpha-2; PEA2-alpha B
UniProt Entry Name	RUNX1_HUMAN
NCBI Protein Information	runt-related transcription factor 1; CBF-alpha-2; PEA2-alpha B; PEBP2-alpha B; oncogene AML-1; AML1-EVI-1 fusion protein; acute myeloid leukemia 1 protein; SL3-3 enhancer factor 1 alpha B subunit; SL3/AKV core-binding factor alpha B subunit; core-binding
NCBI Summary for RUNX1	Core binding factor (CBF) is a heterodimeric transcription factor that binds to the core element of many enhancers and promoters. The protein encoded by this gene represents the alpha subunit of CBF and is thought to be involved in the development of normal hematopoiesis. Chromosomal translocations involving this gene are well-documented and have been associated with several types of leukemia. Three transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2008]

UniProt Comments for RUNX1	AML1: CBF binds to the core site, 5'-PYGPYGGT-3', of a number of enhancers and promoters, including murine leukemia virus, polyomavirus enhancer, T-cell receptor enhancers, LCK, IL-3 and GM-CSF promoters. The alpha subunit binds DNA and appears to have a role in the development of normal hematopoiesis. Isoform AML-1L interferes with the transactivation activity of RUNX1. Acts synergistically with ELF4 to transactivate the IL-3 promoter and with ELF2 to transactivate the mouse BLK promoter. Inhibits KAT6B- dependent transcriptional activation. Heterodimer with CBFB. RUNX1 binds DNA as a monomer and through the Runt domain. DNA-binding is increased by heterodimerization. Isoform AML-1L can neither bind DNA nor heterodimerize. Interacts with TLE1 and ALYREF/THOC4. Interacts with ELF1, ELF2 and SPI1. Interacts via its Runt domain with the ELF4 N-terminal region. Interaction with ELF2 isoform 2 (NERF-1a) may act to repress RUNX1-mediated transactivation. Interacts with KAT6A and KAT6B. Interacts with SUV39H1, leading to abrogation of transactivating and DNA-binding properties of RUNX1. Interacts with YAP1. Interacts with HIPK2. Interaction with CDK6 prevents myeloid differentiation, reducing its transcription transactivation activity. Expressed in all tissues examined except brain and heart. Highest levels in thymus, bone marrow and peripheral blood. 11 isoforms of the human protein are produced by alternative splicing. Protein type: DNA-binding; Oncoprotein; Transcription factor Chromosomal Location of Human Ortholog: 21q22.3 Cellular Component: nucleoplasm; intracellular membrane-bound organelle; cytoplasm; basement membrane; nucleus Molecular Function: protein binding; protein homodimerization activity; DNA binding; protein heterodimerization activity; calcium ion binding; transcription factor binding; transcription factor activity; ATP binding Biological Process: central nervous system development; hair follicle morphogenesis; transcription, DNA-dependent; embryonic hemopoiesis; in utero embryonic development; positive regulation of transcription, DNA-dependent; positive regulation of granulocyte differentiation; regulation of signal transduction; liver development; negative regulation of granulocyte differentiation; peripheral nervous system neuron development; behavioral response to pain; positive regulation of angiogenesis; myeloid progenitor cell differentiation; positive regulation of interleukin-2 production; positive regulation of transcription from RNA polymerase II promoter; hemopoiesis; myeloid cell differentiation; skeletal development Disease: Platelet Disorder, Familial, With Associated Myeloid Malignancy; Leukemia, Acute Myeloid; Rheumatoid Arthritis
Research Articles on RUNX1	**1.** Minimal residual disease, rather than gene mutations, should be used for future treatment stratifications in CBF-acute myeloid leukemia patients.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
