Free Prostate Specific Antigen (FPSA) ELISA Kit for Rabbit

PRODUCT OVERVIEW

Product Name	Free Prostate Specific Antigen (FPSA), ELISA Kit
Full Product Name	Rabbit Free Prostate Specific Antigen ELISA Kit
Product Gene Name	FPSA elisa kit
Species Reactivity	Rabbit
Assay Type	Sandwich
Preparation and Storage	Store all reagents at 2-8 degree C
Related Product Information for FPSA elisa kit	MBS023650 is a ready-to-use microwell, strip-or-full plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Free Prostate Specific Antigen (FPSA) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing FPSA. The ELISA analytical biochemical technique of the MBS023650 kit is based on FPSA antibody-FPSA antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect FPSA antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, FPSA. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of FPSA elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
