CSF1R Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	CSF1R/CD115/FMS, Polyclonal Antibody
Full Product Name	CSF1R/CD115/FMS Rabbit anti-Human Polyclonal Antibody
Product Gene Name	anti-CSF1R antibody
Product Synonym Names	IHC-plus CSF1R/CD115/FMS Antibody; CSF1R; CD115 antigen; CSF-1R; CSF-1-R; CSF-1 receptor; FMS; Fim-2; FIM2; FMS proto-oncogene; M-CSFR; HDLS; M-cfs receptor; C-FMS; CD115; CSF1 receptor; CSFR; M-CSF-R; MCSF Receptor; Proto-oncogene c-Fms
Clonality	Polyclonal
Host	Rabbit
Species Reactivity	Human
Form/Format	PBS, 0.1% Sodium Azide
Purity/Purification	Immunoaffinity purified
Concentration	1mg/ml (lot specific)
Preparation and Storage	Aliquot and store undiluted at -20 degree C or below for up to 1 year. Can be stored undiluted at 4 degree C for up to 1 month. Avoid freeze-thaw cycles.
Molecular Weight	107,984 Da
Chromosome Location	Chromosome: 5; NC_000005.9 (149432854..149492935, complement). Location: 5q32
OMIM	164770
3D Structure	ModBase 3D Structure for P07333
Target	Human CSF1R/CD115/FMS
Immunogen	LP-10474, synthetic peptide
Conjugation	Unconjugated
Family	Protein Kinase
Subfamily	PDGF Receptor
Applications Tested/Suitable for anti-CSF1R antibody	Immunohistochemistry-Paraffin (IHC-P)
Related Product Information for anti-CSF1R antibody	FMS antibody is an unconjugated rabbit polyclonal antibody to FMS (CSF1R/CD115) from human. Validated for IHC. Tested on 20 paraffin-embedded human tissues.
Other Notes	Small volumes of anti-CSF1R antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for CSF1R purchase	MBS2403124 is an antibody targeting CSF1R. Also known as CSF1R/CD115/FMS Rabbit anti-Human Polyclonal Antibody. Reactive in Human. Host: Rabbit.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for CSF1R. It may not necessarily be applicable to this product.

NCBI GI #	27262659
NCBI GeneID	1436
NCBI Accession #	NP_005202.2
UniProt Primary Accession #	P07333
UniProt Secondary Accession #	Q6LDW5; Q6LDY4; Q86VW7; D3DQG2
UniProt Related Accession #	P07333
GenBank Nucleotide #	NM_005211
NCBI Official Full Name	macrophage colony-stimulating factor 1 receptor
NCBI Official Synonym Full Names	colony stimulating factor 1 receptor
NCBI Official Symbol	CSF1R
NCBI Official Synonym Symbols	FMS; CSFR; FIM2; HDLS; C-FMS; CD115; CSF-1R; M-CSF-R
UniProt Protein Name	Macrophage colony-stimulating factor 1 receptor
UniProt Synonym Protein Names	CSF-1 receptor (EC:2.7.10.1); CSF-1-R; CSF-1R; M-CSF-R; Proto-oncogene c-Fms; CD_antigen: CD115
Protein Family	Macrophage colony-stimulating factor 1 receptor
UniProt Gene Name	CSF1R
UniProt Synonym Gene Names	FMS; CSF-1-R; CSF-1R; M-CSF-R
UniProt Entry Name	CSF1R_HUMAN
NCBI Protein Information	macrophage colony-stimulating factor 1 receptor; CD115 antigen; CSF-1 receptor; FMS proto-oncogene; proto-oncogene c-Fms; macrophage colony stimulating factor I receptor; McDonough feline sarcoma viral (v-fms) oncogene homolog
NCBI Summary for CSF1R	The protein encoded by this gene is the receptor for colony stimulating factor 1, a cytokine which controls the production, differentiation, and function of macrophages. This receptor mediates most if not all of the biological effects of this cytokine. Ligand binding activates the receptor kinase through a process of oligomerization and transphosphorylation. The encoded protein is a tyrosine kinase transmembrane receptor and member of the CSF1/PDGF receptor family of tyrosine-protein kinases. Mutations in this gene have been associated with a predisposition to myeloid malignancy. The first intron of this gene contains a transcriptionally inactive ribosomal protein L7 processed pseudogene oriented in the opposite direction. [provided by RefSeq, Jul 2008]

UniProt Comments for CSF1R	CSFR: an oncogenic tyrosine kinase receptor for CSF-1 (M-CSF). Drives growth and development of monocytes. Binding of CSF-1 induces receptor dimerization, activation and autophosphorylation of cytoplasmic tyrosine residues used as docking sites for SH2-containing signaling proteins. There are at least five major tyrosine autophosphorylation sites. Two point mutations seen in 10-20% of patients with acute myeloid leukemia, chronic myelomonocytic leukemia or myelodysplasia. One mutation appears to be both somatic and germline, and disrupts Cbl binding and receptor turnover. v-fms lacks the Cbl binding site and causes feline leukemia. Mutations may also develop after chemotherapy for lymphoma. A distinct point mutation was found in some cases of hepatocellular carcinoma and related to increased expression, and another mutation was found in 2 of 40 patients with idiopathic myelofibrosis. Expression is elevated in breast tumors and cell lines, and expression in xenografts and transgenic mice has been correlated with xenograft growth and breast cancer development. Inhibitors: Ki-20227 and other Kit/PDGFR inhibitors. Protein type: Protein kinase, TK; Protein kinase, tyrosine (receptor); Oncoprotein; Kinase, protein; EC 2.7.10.1; Membrane protein, integral; TK group; PDGFR family Chromosomal Location of Human Ortholog: 5q32 Cellular Component: cell surface; integral to plasma membrane; plasma membrane; receptor complex Molecular Function: macrophage colony stimulating factor receptor activity; protein homodimerization activity; cytokine binding; protein phosphatase binding; ATP binding Biological Process: regulation of bone resorption; peptidyl-tyrosine phosphorylation; phosphoinositide-mediated signaling; macrophage differentiation; monocyte differentiation; multicellular organismal development; cytokine and chemokine mediated signaling pathway; protein amino acid autophosphorylation; osteoclast differentiation; signal transduction; positive regulation of tyrosine phosphorylation of Stat3 protein; cell proliferation; regulation of cell shape; positive regulation of cell proliferation; ruffle organization and biogenesis; innate immune response; hemopoiesis; phosphatidylinositol metabolic process; positive regulation of protein amino acid phosphorylation; inflammatory response; intercellular junction maintenance; transmembrane receptor protein tyrosine kinase signaling pathway; positive regulation of cell migration Disease: Leukoencephalopathy, Diffuse Hereditary, With Spheroids
Research Articles on CSF1R	**1.** Data indicate that blood treated with EDTA and refrigerated maintained CD115 stability.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
