FOLR1 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	FOLR1, Polyclonal Antibody
Full Product Name	FOLR1 Polyclonal Antibody
Product Gene Name	anti-FOLR1 antibody
Product Synonym Names	adult; Adult folate binding protein; Adult folate-binding protein; FBP; Folate Receptor 1 Adult; Folate receptor 1; Folate Receptor 1 Precursor; Folate receptor adult; Folate receptor alpha; Folate receptor; FOLR; FOLR1; FOLR1; FR alpha; FR-alpha; FRalpha; KB cells FBP; MOV18; Ovarian cancer associated antigen; Ovarian tumor associated antigen; Ovarian tumor associated antigen MOv18; Ovarian tumor-associated antigen MOv18
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human, Mouse
Form/Format	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.
Purity/Purification	Antigen Affinity Purification
Preparation and Storage	Store at -20 degree C. Avoid freeze/thaw cycles.
OMIM	136430
3D Structure	ModBase 3D Structure for P15328
Immunogen	Synthetic peptide of human FOLR1
Conjugation	Unconjugated
Note	Centrifuge before opening to ensure complete recovery of vial contents
Product Categories/Family for anti-FOLR1 antibody	Cancer; Tags and Cell Markers
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Applications Tested/Suitable for anti-FOLR1 antibody	Immunohistochemistry (IHC)
Application Notes for anti-FOLR1 antibody	IHC: 1:40-1:200
Related Product Information for anti-FOLR1 antibody	Folate receptor 1 (FOLR1),also known as folate receptor alpha or adult folate-binding protein (FBP),is a 38-kDa glycoprotein belonging to the folate receptor family. The receptor binds to folate and reduced folic acid derivatives and mediates delivery of 5-methyltetrahydrofolate to the interior of cells. FOLR1 is a secreted protein that either anchors to membranes via a glycosyl-phosphatidylinositol linkage or exists in a soluble form. FOLR1 expression is often limited to the apical surfaces of epithelium in the lung,kidney and choroid plexus but is differentially overexpressed in a variety of solid tumors such as ovarian cancer,non-small cell lung cancer,breast cancer,kidney cancer and high-grade osteosarcoma.
Other Notes	Small volumes of anti-FOLR1 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for FOLR1 purchase	MBS2561767 is an antibody targeting FOLR1. Also known as FOLR1 Polyclonal Antibody. Reactive in Human, Mouse. Host: Rabbit.

Immunohistochemistry (IHC) of anti-FOLR1 antibody
Immunohistochemistry of paraffin-embedded Human tonsil tissue using FOLR1 Polyclonal Antibody at dilution of 1:80(×200)

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for FOLR1. It may not necessarily be applicable to this product.

NCBI GI #	4758400
NCBI GeneID	2348
NCBI Accession #	NP_000793.1
UniProt Primary Accession #	P15328
UniProt Related Accession #	P15328
GenBank Nucleotide #	NP_000793.1
NCBI Official Full Name	folate receptor alpha
NCBI Official Synonym Full Names	folate receptor alpha
NCBI Official Symbol	FOLR1
NCBI Official Synonym Symbols	FBP; FOLR; FRalpha
UniProt Protein Name	Folate receptor alpha
UniProt Synonym Protein Names	Adult folate-binding protein; FBP; Folate receptor 1; Folate receptor, adult; KB cells FBP; Ovarian tumor-associated antigen MOv18
Protein Family	Folate receptor
UniProt Gene Name	FOLR1
UniProt Synonym Gene Names	FOLR; FR-alpha; FBP
UniProt Entry Name	FOLR1_HUMAN
NCBI Protein Information	folate receptor alpha
NCBI Summary for FOLR1	The protein encoded by this gene is a member of the folate receptor family. Members of this gene family bind folic acid and its reduced derivatives, and transport 5-methyltetrahydrofolate into cells. This gene product is a secreted protein that either anchors to membranes via a glycosyl-phosphatidylinositol linkage or exists in a soluble form. Mutations in this gene have been associated with neurodegeneration due to cerebral folate transport deficiency. Due to the presence of two promoters, multiple transcription start sites, and alternative splicing, multiple transcript variants encoding the same protein have been found for this gene. [provided by RefSeq, Oct 2009]

UniProt Comments for FOLR1	FOLR1: Binds to folate and reduced folic acid derivatives and mediates delivery of 5-methyltetrahydrofolate to the interior of cells. Defects in FOLR1 are the cause of neurodegeneration due to cerebral folate transport deficiency (NCFTD). NCFTD is an autosomal recessive disorder resulting from brain- specific folate deficiency early in life. Onset is apparent in late infancy with severe developmental regression, movement disturbances, epilepsy, and leukodystrophy. Recognition and diagnosis of this disorder is critical because folinic acid therapy can reverse the clinical symptoms and improve brain abnormalities and function. Belongs to the folate receptor family. Protein type: Membrane protein, GPI anchor Chromosomal Location of Human Ortholog: 11q13.3-q14.1 Cellular Component: anchored to external side of plasma membrane; cell surface; membrane; clathrin-coated vesicle; brush border membrane; integral to plasma membrane; apical plasma membrane; plasma membrane; endosome Molecular Function: folic acid transporter activity; receptor activity; folic acid binding Biological Process: receptor-mediated endocytosis; folic acid metabolic process; folic acid transport Disease: Neurodegeneration Due To Cerebral Folate Transport Deficiency

Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
