# Peroxidase Stabilizing Buffer Reagent

## PRODUCT OVERVIEW

| | |
|---|---|
| **Product Name** | Peroxidase Stabilizing Buffer, Reagent |
| **Full Product Name** | Peroxidase Stabilizing Buffer |
| **Preparation and Storage** | Store at 2-8 degree C. DO NOT FREEZE |
| **Notes** | Buffer ready to use |
| **Product Categories/Family for Peroxidase Stabilizing Buffer reagent** | IHC Reagents |
| **Applications Tested/Suitable for Peroxidase Stabilizing Buffer reagent** | Western Blot (WB), Immunohistochemistry (IHC), Immunocytochemistry (ICC), ELISA (EIA) |
| **Application Notes for Peroxidase Stabilizing Buffer reagent** | Dilute HRP-conjugates in this buffer as recommended in the protocol by the manufacturer of these products. The diluted products (Streptavidin conjugated with HRP) can be stored at 2-8 degree C for up to 18 months in this buffer. This buffer can also be used as a negative control in immunoassays. |
| **Related Product Information for Peroxidase Stabilizing Buffer reagent** | This horseradish peroxidase (HRP) stabilizing buffer is ready-to-use for peroxidase conjugates and as negative control in immunoassays. It is to be used as a diluent for peroxidase-conjugates. It reduces background in EISA, western blots (WB), Immunohistochemistry (IHC) and Immunofluorescence (IF). This buffer does not contain sodium azide or mercury preservative. |
| **Other Notes** | Small volumes of Peroxidase Stabilizing Buffer reagent vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply. |
| **Searchable Terms for Peroxidase Stabilizing Buffer purchase** | MBS258500 is a reagent targeting Peroxidase Stabilizing Buffer. |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures.
