Rsistin ELISA Kit for Mouse

PRODUCT OVERVIEW

Product Name	Rsistin, ELISA Kit
Full Product Name	Mouse Rsistin ELISA Kit
Species Reactivity	Mouse
Preparation and Storage	Store all reagents at 2-8 degree C.
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Related Product Information for Rsistin elisa kit	MBS2610673 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Rsistin, ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing Rsistin. The ELISA analytical biochemical technique of the MBS2610673 kit is based on Rsistin antibody-Rsistin antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect Rsistin antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, Rsistin. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of Rsistin elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
