Interferon Lambda (IFN-) (IFN) ELISA Kit for Canine

PRODUCT OVERVIEW

Product Name	interferon lambda (IFN-), ELISA Kit
Full Product Name	Canine interferon lambda (IFN-) ELISA Kit
Product Gene Name	IFN- elisa kit
Species Reactivity	Canine
Preparation and Storage	Store all reagents at 2-8 degree C.
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Related Product Information for IFN- elisa kit	MBS2616012 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the interferon lambda (IFN-) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing IFN-. The ELISA analytical biochemical technique of the MBS2616012 kit is based on IFN-antibody-IFN- antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect IFN-antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, IFN-. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of IFN- elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
