3-Methyl Noradrenaline (3MNADR) ELISA Kit for Hamster

PRODUCT OVERVIEW

Product Name	3-Methyl Noradrenaline (3MNADR), ELISA Kit
Full Product Name	Hamster 3-Methyl Noradrenaline ELISA Kit
Product Gene Name	3MNADR elisa kit
Species Reactivity	Hamster
Assay Type	Sandwich
Preparation and Storage	Store all reagents at 2-8 degree C
Related Product Information for 3MNADR elisa kit	MBS028311 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the 3-Methyl Noradrenaline (3MNADR) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing 3MNADR. The ELISA analytical biochemical technique of the MBS028311 kit is based on 3MNADR antibody-3MNADR antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect 3MNADR antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, 3MNADR. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of 3MNADR elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
