Soluble Endothelial Selectin (SE-SELECTIN) ELISA Kit for Cavy

PRODUCT OVERVIEW

Product Name	Soluble Endothelial Selectin (SE-SELECTIN), ELISA Kit
Full Product Name	Cavy Soluble Endothelial Selectin ELISA Kit
Product Gene Name	SE-SELECTIN elisa kit
Species Reactivity	Cavy
Assay Type	Sandwich
Preparation and Storage	Store all reagents at 2-8 degree C
Related Product Information for SE-SELECTIN elisa kit	MBS031092 is a ready-to-use microwell, strip-or-full plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Soluble Endothelial Selectin (SE-SELECTIN) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing SE-SELECTIN. The ELISA analytical biochemical technique of the MBS031092 kit is based on SE-SELECTIN antibody-SE-SELECTIN antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect SE-SELECTIN antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, SE-SELECTIN. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of SE-SELECTIN elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
