TRIM16 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	TRIM16, Polyclonal Antibody
Full Product Name	TRIM16 antibody - N-terminal region
Product Gene Name	anti-TRIM16 antibody
Product Synonym Gene Name	EBBP
Immunogen Sequence	Synthetic peptide located within the following region: PLPRATAQPP APLSPDSGSP SPDSGSASPV EEEDVGSSEK LGRETEEQDS
Clonality	Polyclonal
Host	Rabbit
Species Reactivity	Human
Form/Format	Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.
Purity/Purification	Protein A purified
Preparation and Storage	For short term use, store at 2-8 degree C up to 1 week. For long term storage, store at -20 degree C in small aliquots to prevent freeze-thaw cycles.
Antibody/Peptide Pairs	TRIM16 peptide (MBS3229251) is used for blocking the activity of TRIM16 antibody (MBS3204284)
Molecular Weight	64kDa
OMIM	609505
3D Structure	ModBase 3D Structure for O95361
Homology	Human: 100%
Immunogen	The immunogen is a synthetic peptide directed towards the N terminal region of human TRIM16
Product Categories/Family for anti-TRIM16 antibody	Polyclonal; Transcription Factor; Transcription Regulation; Transcription Regulation; Acetylation; Transcription Factors
Applications Tested/Suitable for anti-TRIM16 antibody	Western Blot (WB)
Related Product Information for anti-TRIM16 antibody	This is a rabbit polyclonal antibody against TRIM16. It was validated on Western Blot using a cell lysate as a positive control. Target Description: This gene was identified as an estrogen and anti-estrogen regulated gene in epithelial cells stably expressing estrogen receptor. TRIM16 contains two B box domains and a coiled-coiled region that are characteristic of the B box zinc finger protein family. The proteins of this family have been reported to be involved in a variety of biological processes including cell growth, differentiation and pathogenesis. Its function, however, has not yet been determined.This gene was identified as an estrogen and anti-estrogen regulated gene in epithelial cells stably expressing estrogen receptor. The protein encoded by this gene contains two B box domains and a coiled-coiled region that are characteristic of the B box zinc finger protein family. The proteins of this family have been reported to be involved in a variety of biological processes including cell growth, differentiation and pathogenesis. Expression of this gene was detected in most tissues. Its function, however, has not yet been determined.
Other Notes	Small volumes of anti-TRIM16 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

Searchable Terms for TRIM16 purchase	MBS3204284 is an antibody targeting TRIM16. Also known as TRIM16 antibody - N-terminal region. Reactive in Human. Host: Rabbit.

Western Blot (WB) of anti-TRIM16 antibody

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for TRIM16. It may not necessarily be applicable to this product.

NCBI GI #	48255913
NCBI GeneID	10626
NCBI Accession #	NP_006461
UniProt Primary Accession #	O95361
UniProt Related Accession #	O95361
GenBank Nucleotide #	NM_006470
NCBI Official Full Name	tripartite motif-containing protein 16 isoform a
NCBI Official Synonym Full Names	tripartite motif containing 16
NCBI Official Symbol	TRIM16
NCBI Official Synonym Symbols	EBBP
UniProt Protein Name	Tripartite motif-containing protein 16
UniProt Synonym Protein Names	Estrogen-responsive B box protein
Protein Family	Tripartite motif-containing protein
UniProt Gene Name	TRIM16
UniProt Synonym Gene Names	EBBP
UniProt Entry Name	TRI16_HUMAN
NCBI Protein Information	tripartite motif-containing protein 16
NCBI Summary for TRIM16	The protein encoded by this gene is a tripartite motif (TRIM) family member that contains two B box domains and a coiled-coiled region that are characteristic of the B box zinc finger protein family. While it lacks a RING domain found in other TRIM proteins, the encoded protein can homodimerize or heterodimerize with other TRIM proteins and has E3 ubiquitin ligase activity. This gene is also a tumor suppressor and is involved in secretory autophagy. [provided by RefSeq, Jan 2017]

UniProt Comments for TRIM16	TRIM16: May play a role in the regulation of keratinocyte differentiation. Belongs to the TRIM/RBCC family. 2 isoforms of the human protein are produced by alternative splicing. Protein type: Unknown function Chromosomal Location of Human Ortholog: 17p11.2 Cellular Component: PML body; cytoplasm Molecular Function: protein binding; NACHT domain binding; DNA binding; zinc ion binding; interleukin-1 binding Biological Process: response to organophosphorus; response to retinoic acid; positive regulation of transcription, DNA-dependent; positive regulation of retinoic acid receptor signaling pathway; positive regulation of interleukin-1 beta secretion; positive regulation of keratinocyte differentiation
Research Articles on TRIM16	**1.** High TRIM16 expression is associated with drug resistance in Non-Small Cell Lung Cancer.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
