Platelet Associated Antibody IgM (PA-IgM) ELISA Kit for Porcine

PRODUCT OVERVIEW

Product Name	Platelet Associated Antibody IgM (PA-IgM), ELISA Kit
Full Product Name	Porcine Platelet Associated Antibody IgM ELISA Kit
Product Gene Name	PA-IgM elisa kit
Species Reactivity	Porcine
Assay Type	Sandwich
Preparation and Storage	Store all reagents at 2-8 degree C
Related Product Information for PA-IgM elisa kit	MBS032713 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Platelet Associated Antibody IgM (PA-IgM) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing PA-IgM. The ELISA analytical biochemical technique of the MBS032713 kit is based on PA-IgM antibody-PA-IgM antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect PA-IgM antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, PA-IgM. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of PA-IgM elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
