Presynaptic Membrane Receptor (PSMR) ELISA Kit for Canine

PRODUCT OVERVIEW

Product Name	Presynaptic Membrane Receptor Antibody (PSMR), ELISA Kit
Full Product Name	Canine Presynaptic Membrane Receptor Antibody ELISA Kit
Product Gene Name	PSMR elisa kit
Species Reactivity	Canine
Assay Type	Sandwich
Preparation and Storage	Store all reagents at 2-8 degree C
Related Product Information for PSMR elisa kit	MBS034330 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Presynaptic Membrane Receptor Antibody (PSMR) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing PSMR. The ELISA analytical biochemical technique of the MBS034330 kit is based on PSMR antibody-PSMR antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect PSMR antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, PSMR. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of PSMR elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
