# Glomerular Basement Membrane (GBM-Ab) ELISA Kit for Human

## PRODUCT OVERVIEW

| | |
|---|---|
| **Product Name** | Glomerular Basement Membrane (GBM-Ab), ELISA Kit |
| **Full Product Name** | Human Glomerular Basement Membrane Antibody (GBM-Ab) ELISA Kit |
| **Product Gene Name** | GBM-Ab elisa kit |
| **Species Reactivity** | Human |
| **Sensitivity** | 0.1 ng/mL |
| **Inter-assay Precision** | Inter-assay CV are less than 15%. |
| **Intra-assay Precision** | Intra-assay CV are less than 15%. |
| **Production Time** | Due to severe delay and raw materials shortage, production time may takes between 5-8 weeks. |
| **Related Product Information for GBM-Ab elisa kit** | Intended Uses: This GBM-AB ELISA kit is intended Laboratory for Research use only and is not for use in test or therapeutic procedures. The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of GBM-AB in the sample, this GBM-AB ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus GBM-AB concentration. The concentration of GBM-AB in the samples is then determined by comparing the O.D. of the samples to the standard curve. |
| **Other Notes** | Small volumes of GBM-Ab elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply. |
| **Searchable Terms for GBM-Ab purchase** | MBS3800877 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Glomerular Basement Membrane (GBM-Ab) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing GBM-Ab. The ELISA analytical biochemical technique of the MBS3800877 kit is based on GBM-Ab antibody-GBM-Ab antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect GBM-Ab antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, GBM-Ab. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%). |

**Typical Testing Data/Standard Curve (for reference only) of GBM-Ab elisa kit**

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures.
