Neutrophil Activating Protein-2 (NAP-2) ELISA Kit for Bovine

PRODUCT OVERVIEW

Product Name	Neutrophil Activating Protein-2 (NAP-2), ELISA Kit
Full Product Name	Bovine Neutrophil Activating Protein-2 ELISA Kit
Product Gene Name	NAP-2 elisa kit
Species Reactivity	Bovine
Assay Type	Sandwich
Preparation and Storage	Store all reagents at 2-8 degree C
Related Product Information for NAP-2 elisa kit	MBS045127 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Neutrophil Activating Protein-2 (NAP-2) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing NAP-2. The ELISA analytical biochemical technique of the MBS045127 kit is based on NAP-2 antibody-NAP-2 antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect NAP-2 antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, NAP-2. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of NAP-2 elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
