IL-10 Antibody – Rat

PRODUCT OVERVIEW

Product Name	IL-10, Antibody
Full Product Name	PE Anti-Mouse IL-10 Antibody
Product Gene Name	anti-IL-10 antibody
Product Synonym Names	Interleukin-10, IL-10, Cytokine synthesis inhibitory factor, CSIF
Host	Rat
Species Reactivity	Mouse
Form/Format	PBS with 0.05% Proclin300, 1% BSA
Concentration	0.2mg/mL (lot specific)
Preparation and Storage	Store at 2~8 degree C and protected from prolonged exposure to light. Do not freeze.
Molecular Weight	20,641 Da
3D Structure	ModBase 3D Structure for P18893
Conjugation	PE
Product Categories/Family for anti-IL-10 antibody	Flow Cytometry Antibodies
ISO Certification	Manufactured in an ISO 13485:2003 and EN ISO 13485:2012 Certified Laboratory.
Applications Tested/Suitable for anti-IL-10 antibody	Intracellular Staining for Flow Cytometry (ICFCM)
Related Product Information for anti-IL-10 antibody	MBS4515468 is an antibody targeting IL-10. Also known as PE Anti-Mouse IL-10 Antibody. Reactive in Mouse. Host: Rat.
Other Notes	Small volumes of anti-IL-10 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for IL-10. It may not necessarily be applicable to this product.

NCBI GI #	6754318
NCBI GeneID	16153
NCBI Accession #	NP_034678.1
UniProt Primary Accession #	P18893
UniProt Secondary Accession #	Q0VBJ1
UniProt Related Accession #	P18893
GenBank Nucleotide #	NM_010548.2
NCBI Official Full Name	interleukin-10
NCBI Official Synonym Full Names	interleukin 10

NCBI Official Symbol	Il10
NCBI Official Synonym Symbols	CSIF; Il-10
UniProt Protein Name	Interleukin-10
UniProt Synonym Protein Names	Cytokine synthesis inhibitory factor; CSIF
UniProt Gene Name	Il10
UniProt Synonym Gene Names	Il-10; IL-10; CSIF
UniProt Entry Name	IL10_MOUSE
NCBI Protein Information	interleukin-10; cytokine synthesis inhibitory factor
UniProt Comments for IL-10	IL10: Inhibits the synthesis of a number of cytokines, including IFN-gamma, IL-2, IL-3, TNF and GM-CSF produced by activated macrophages and by helper T-cells. Belongs to the IL-10 family. Protein type: Secreted; Motility/polarity/chemotaxis; Cytokine; Secreted, signal peptide Cellular Component: extracellular space; extracellular region Molecular Function: cytokine activity; interleukin-10 receptor binding Biological Process: negative regulation of chronic inflammatory response to antigenic stimulus; positive regulation of transcription, DNA-dependent; response to glucocorticoid stimulus; positive regulation of JAK-STAT cascade; negative regulation of B cell proliferation; negative regulation of membrane protein ectodomain proteolysis; positive regulation of MHC class II biosynthetic process; response to molecule of bacterial origin; negative regulation of interferon-gamma production; negative regulation of interleukin-6 production; negative regulation of tumor necrosis factor biosynthetic process; inflammatory response; negative regulation of interleukin-12 production; positive regulation of B cell apoptosis; negative regulation of myeloid dendritic cell activation; negative regulation of nitric oxide biosynthetic process; negative regulation of tumor necrosis factor production; negative regulation of cytokine secretion during immune response; regulation of gene expression; negative regulation of inflammatory response; defense response to bacterium; negative regulation of cytokine production; immune response; positive regulation of transcription factor activity; positive regulation of transcription from RNA polymerase II promoter; regulation of sensory perception of pain; receptor biosynthetic process; positive regulation of cytokine secretion; negative regulation of apoptosis
Research Articles on IL-10	**1.** Dystrophin-deficient transgenic mice develop severe cardiac and respiratory dysfunction following genetic ablation of the anti-inflammatory cytokine IL-10.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
