Dipeptidase 3 (DPEP3) ELISA Kit for Human

PRODUCT OVERVIEW

Product Name	Dipeptidase 3 (DPEP3), ELISA Kit
Full Product Name	Human Dipeptidase 3 (DPEP3) ELISA Kit
Product Gene Name	DPEP3 elisa kit
Product Synonym Names	MBD3
Species Reactivity	Human
Assay Type	Sandwich
Samples	Tissue Homogenates, Cell Lysates or Other Biological Fluids.
Detection Range	0.312-20ng/mL
Sensitivity	0.105ng/mL
Preparation and Storage	For unopened kits: All the reagents should be kept at 4 degree C upon receipt. For opened kits: Once the kit is opened, the remaining reagents still need to be stored according to the above storage conditions. In addition, return the unused wells to the foil pouch containing the desiccant pack and reseal along entire edge of zip-seal.
Molecular Weight	53,687 Da
OMIM	609926
3D Structure	ModBase 3D Structure for Q9H4B8
RTU ELISA Kit's Advantage	The Ready-To-Use (RTU) Kits require fewer steps in setup and take less time to run. Detection Solutions are pre-diluted and total incubation time is shorter than many other ELISA Kits.
ISO Certification	Manufactured in an ISO 13485:2003 and EN ISO 13485:2012 Certified Laboratory.
Related Product Information for DPEP3 elisa kit	Test Principle: The microtiter plate provided in this kit has been pre-coated with an antibody specific to DPEP3. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to DPEP3. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain DPEP3, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of DPEP3 in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Other Notes	Small volumes of DPEP3 elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for DPEP3 purchase	MBS458908 is a ready-to-use microwell, strip-or-full plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Dipeptidase 3 (DPEP3) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing DPEP3. The ELISA analytical biochemical technique of the MBS458908 kit is based on DPEP3 antibody-DPEP3 antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect DPEP3 antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, DPEP3. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).

Typical Testing Data/Standard Curve (for reference only) of DPEP3 elisa kit

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for DPEP3. It may not necessarily be applicable to this product.

NCBI GI #	193211610
NCBI GeneID	64180
NCBI Accession #	NP_001123230.1
UniProt Primary Accession #	Q9H4B8
UniProt Secondary Accession #	Q6PEZ5; Q6UXE4; B3KQ48
UniProt Related Accession #	Q9H4B8
GenBank Nucleotide #	NM_001129758.1
NCBI Official Full Name	dipeptidase 3 isoform b
NCBI Official Synonym Full Names	dipeptidase 3
NCBI Official Symbol	DPEP3
NCBI Official Synonym Symbols	MBD3
UniProt Protein Name	Dipeptidase 3
Protein Family	Dipeptidase
UniProt Gene Name	DPEP3
NCBI Protein Information	dipeptidase 3
NCBI Summary for DPEP3	This gene encodes a membrane-bound glycoprotein from the family of dipeptidases involved in hydrolytic metabolism of various dipeptides, including penem and carbapenem beta-lactam antibiotics. This gene is located on chromosome 16 in a cluster with another member of this family. Alternatively spliced transcript variants that encode different isoforms have been found for this gene. [provided by RefSeq, Jul 2008]
UniProt Comments for DPEP3	Probable metalloprotease which hydrolyzes cystinyl-bis-glycine. May be involved in meiosis ().
Research Articles on DPEP3	**1.** This paper describes differences in substrate specificity and tissue distribution of membrane-bound dipeptidase 3 from mouse in comparison to other mouse members of this family.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.

Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
