Liver Kidney Microsome Auto (LKM-AA) ELISA Kit for Cavy

PRODUCT OVERVIEW

Product Name	Liver Kidney Microsome Autoantibody (LKM-AA), ELISA Kit
Full Product Name	Cavy Liver Kidney Microsome Autoantibody ELISA Kit
Product Gene Name	LKM-AA elisa kit
Species Reactivity	Cavy
Assay Type	Sandwich
Preparation and Storage	Store all reagents at 2-8 degree C
Related Product Information for LKM-AA elisa kit	MBS045911 is a ready-to-use microwell, strip-or-full plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Liver Kidney Microsome Autoantibody (LKM-AA) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing LKM-AA. The ELISA analytical biochemical technique of the MBS045911 kit is based on LKM-AA antibody-LKM-AA antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect LKM-AA antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, LKM-AA. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of LKM-AA elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
