POMT2 Positive Control

PRODUCT OVERVIEW

Product Name	POMT2, Positive Control
Full Product Name	POMT2 Positive Control
Product Gene Name	POMT2 positive control
Product Synonym Names	A830009D15Rik; AW046274; DKFZp686G10254; Dolichyl phosphate mannose protein mannosyltransferase 2; FLJ22309; LGMD2N; MDDGA2; MDDGB2; MDDGC2; POMT 2; Protein O mannosyltransferase 2; Putative protein O mannosyltransferase; rCG_20643 antibody
Form/Format	Western Blot Positive Control
Preparation and Storage	-20• degree C for long term storage
Matching Pairs	Antibody: POMT2 (MBS540753) Positive Control: POMT2 (MBS543147)
Matching Pairs	Antibody: POMT2 (MBS544077) Positive Control: POMT2 (MBS543147)
Matching Pairs	Antibody: POMT2 (MBS544078) Positive Control: POMT2 (MBS543147)
Molecular Weight	8,899 Da
OMIM	607439
3D Structure	ModBase 3D Structure for Q9UKY4
Immunogen	Purified Protein
Expression	Highly expressed in testis; detected at low levels in most tissues.
Molecular Function	dolichyl-phosphate-mannose-protein mannosyltransferase acitivity, metal ion binding
Subcellular Location	Endoplasmic Reticulum membrane, multi-pass membrane protein
Applications Tested/Suitable for POMT2 positive control	Western Blot (WB)
Application Notes for POMT2 positive control	Western Blot: 1:500
Related Product Information for POMT2 positive control	Western Blot Positive Control Protein O-mannosyl-transferase 2 Transfers mannosyl residues to the hydroxyl group of serine or threonine residues. Coexpression of both POMT1 and POMT2 is necessary for enzyme activity, expression of either POMT1 or POMT2 alone is insufficient.
Other Notes	Small volumes of POMT2 positive control vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for POMT2 purchase	MBS543147 is a positive control targeting POMT2.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for POMT2. It may not necessarily be applicable to this product.

NCBI GI #	32171723
NCBI GeneID	29954

NCBI Accession #	Q9UKY4.2
UniProt Primary Accession #	Q9UKY4
UniProt Secondary Accession #	Q9NSG6; Q9P1W0; Q9P1W2
NCBI Official Full Name	Protein O-mannosyl-transferase 2
UniProt Protein Name	Protein O-mannosyl-transferase 2
UniProt Synonym Protein Names	Dolichyl-phosphate-mannose--protein mannosyltransferase 2
Protein Family	Protein O-mannosyl-transferase
UniProt Gene Name	POMT2
UniProt Entry Name	POMT2_HUMAN
UniProt Comments for POMT2	POMT2: Transfers mannosyl residues to the hydroxyl group of serine or threonine residues. Coexpression of both POMT1 and POMT2 is necessary for enzyme activity, expression of either POMT1 or POMT2 alone is insufficient. Defects in POMT2 are the cause of muscular dystrophy- dystroglycanopathy congenital with brain and eye anomalies type A2 (MDDGA2); also called Walker-Warburg syndrome or muscle-eye-brain disease POMT2-related. MDDGA2 is a autosomal recessive disorder characterized by congenital muscular dystrophy associated with cobblestone lissencephaly and other brain anomalies, eye malformations, profound mental retardation, and death usually in the first years of life. Included diseases are the more severe Walker-Warburg syndrome and the slightly less severe muscle-eye-brain disease. Defects in POMT2 are the cause of muscular dystrophy- dystroglycanopathy congenital with mental retardation type B2 (MDDGB2); also called muscular dystrophy congenital POMT2-related. MDDGB2 is an autosomal recessive disorder characterized by congenital muscular dystrophy associated with mental retardation and mild structural brain abnormalities. Defects in POMT2 are the cause of muscular dystrophy-dystroglycanopathy limb-girdle type C2 (MDDGC2); also called limb-girdle muscular dystrophy type 2N (LGMD2N) or muscular dystrophy-dystroglycanopathy limb-girdle POMT2-related (MDGD2C). MDDGC2 is an autosomal recessive muscular dystrophy with onset after ambulation is achieved. MDDGC2 is characterized by increased serum creatine kinase and mild muscle weakness. Muscle biopsy shows dystrophic changes, inflammatory changes, and severely decreased alpha-dystroglycan. Cognition is normal. Belongs to the glycosyltransferase 39 family. 2 isoforms of the human protein are produced by alternative splicing. Protein type: Endoplasmic reticulum; EC 2.4.1.109; Membrane protein, integral; Transferase; Membrane protein, multi-pass; Glycan Metabolism - O-mannosyl glycan biosynthesis Chromosomal Location of Human Ortholog: 14q24 Cellular Component: endoplasmic reticulum membrane; integral to membrane Molecular Function: dolichyl-phosphate-mannose-protein mannosyltransferase activity; metal ion binding Biological Process: cell wall mannoprotein biosynthetic process; multicellular organismal development; protein amino acid O-linked glycosylation; protein amino acid O-linked mannosylation Disease: Muscular Dystrophy-dystroglycanopathy (congenital With Brain And Eye Anomalies), Type A, 1; Muscular Dystrophy-dystroglycanopathy (congenital With Brain And Eye Anomalies), Type A, 2; Muscular Dystrophy-dystroglycanopathy (congenital With Mental Retardation), Type B, 2; Muscular Dystrophy-dystroglycanopathy (limb-girdle), Type C, 2
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.

Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
