Related Product Information for CHRG01 peptide	CHRG01, a biologically active peptide, originates from the C-terminal amino acids 54 to 67 of human beta-defensin 3 (hBD-3), with a modified structure wherein all cysteine (Cys) residues are replaced by serine (Ser) to eliminate disulfide bond linkages. Like its parent compound hBD-3, CHRG01 exhibits antimicrobial properties that are dependent on electrostatic interactions.
Other Notes	Small volumes of CHRG01 peptide vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
