Tacedinaline

PRODUCT OVERVIEW

Product Name	Tacedinaline, Biochemical
Full Product Name	Tacedinaline
Preparation and Storage	Room Temperature
Molecular Weight	269.3
CAS Number	112522-64-2
Molecular Formula	C15H15N3O2
Product Categories/Family for Tacedinaline biochemical	Biochemicals; Biochem-Inhibitors
Related Product Information for Tacedinaline biochemical	Tacedinaline is a histone deacetylase (HDAC) inhibitor. Tacedinaline is an anti-cancer agent as HDAC inhibitors block angiogenesis, arrest cell growth, and lead to differentiation and apoptosis in tumor cells. Studies show Tacedinaline to be effective against acute myeloid leukemia in vitro and in vivo when used in combination with conventional anti-cancer agents.
Other Notes	Small volumes of Tacedinaline biochemical vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for Tacedinaline purchase	MBS6108608 is a biochemical targeting Tacedinaline.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
