PKD2L1 Antibody – Mouse Monoclonal

PRODUCT OVERVIEW

Product Name	PKD2L1, Monoclonal Antibody
Full Product Name	PKD2L1 (Polycystic Kidney Disease 2-like 1 Protein, Polycystin-2 Homolog, Polycystin-2L1, Polycystin-L, Polycystin-L1, PKD2L, PKDL, TRPP3) (AP)
Product Gene Name	anti-PKD2L1 antibody
Clonality	Monoclonal
Isotype	IgG2b,k
Clone Number	4F9
Host	Mouse
Species Reactivity	Human
Form/Format	Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with Alkaline Phosphatase (AP).
Purity/Purification	Purified by Protein A Affinity Chromatography.
Specificity	Recognizes human PKD2L1.
Preparation and Storage	Store product at 4 degree C. DO NOT FREEZE! Stable at 4 degree C for 12 months after receipt as an undiluted liquid. Dilute required amount only pri to immediate use. Further dilutions can be made in assay buffer. For maximum recovery of product, centrifuge the original vial prior to removing the cap
OMIM	AF073481 mRNA
3D Structure	ModBase 3D Structure for Q9P0L9
Immunogen	Partial recombinant corresponding to aa173-273 from PKD2L1 (NP_057196) with GST tag. MW of the GST tag alone is 26kD.
Immunogen Sequence	KWYNNQSLGHGSHSFIYYENMLLGVPRLRQLKVRNDSCVVHEDFREDILSCYDVYSPDKEEQLPFGPFNGTAWTYHSQDELGGFSHWGRLTSYSGGG
Conjugate	AP
Product Categories/Family for anti-PKD2L1 antibody	Antibodies; Disease Markers
Applications Tested/Suitable for anti-PKD2L1 antibody	ELISA (EIA), Western Blot (WB)
Application Notes for anti-PKD2L1 antibody	Applications are based on unconjugated antibody.
Related Product Information for anti-PKD2L1 antibody	PKD2L1 is a member of the polycystin protein family. The encoded protein contains multiple transmembrane domains, and cytoplasmic N- and C-termi The protein may be an integral membrane protein involved in cell-cell/matrix interactions. This protein functions as a calcium-regulated nonselective ca channel. Alternative splice variants have been described but their full length sequences have not been determined.

Other Notes	Small volumes of anti-PKD2L1 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry and additional dry ice fee may apply.
Searchable Terms for PKD2L1 purchase	MBS6132979 is an antibody targeting PKD2L1. Also known as PKD2L1 (Polycystic Kidney Disease 2-like 1 Protein, Polycystin-2 Homolog, Polycystin-2L1, Polycystin-L, Polycystin-L1, PKD2L, PKDL, TRPP3) (AP). Reactive in Human. Host: Mouse.

Western Blot (WB) of anti-PKD2L1 antibody
Western Blot detection against Immunogen (37.11kD).

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for PKD2L1. It may not necessarily be applicable to this product.

NCBI GI #	33598944
NCBI GeneID	9033
NCBI Accession #	NP_057196
UniProt Primary Accession #	Q9P0L9
UniProt Related Accession #	Q9P0L9
GenBank Nucleotide #	NM_016112
NCBI Official Full Name	polycystic kidney disease 2-like 1 protein isoform 1
NCBI Official Synonym Full Names	polycystin 2 like 1, transient receptor potential cation channel
NCBI Official Symbol	PKD2L1
NCBI Official Synonym Symbols	PCL; PKDL; PKD2L; TRPP3
UniProt Protein Name	Polycystic kidney disease 2-like 1 protein
UniProt Synonym Protein Names	Polycystin-2 homolog; Polycystin-2L1; Polycystin-L; Polycystin-L1
Protein Family	Polycystic kidney disease 2-like 1 protein
UniProt Gene Name	PKD2L1
UniProt Synonym Gene Names	PKD2L; PKDL; TRPP3
NCBI Protein Information	polycystic kidney disease 2-like 1 protein
NCBI Summary for PKD2L1	This gene encodes a member of the polycystin protein family. The encoded protein contains multiple transmembrane domains, and cytoplasmic N- and C-termini. The protein may be an integral membrane protein involved in cell-cell/matrix interactions. This protein functions as a calcium-regulated nonselective cation channel. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Dec 2011]

UniProt Comments for PKD2L1	PKD2L1: May function as a subunit of an ion channel and act as a transducer of calcium-mediated signaling. Belongs to the polycystin family. 4 isoforms of the human protein are produced by alternative splicing. Protein type: Channel, cation; Membrane protein, integral; Membrane protein, multi-pass; Motility/polarity/chemotaxis Chromosomal Location of Human Ortholog: 10q24.31 Cellular Component: cell surface; endoplasmic reticulum; integral component of membrane; intracellular membrane-bound organelle; membrane; plasma membrane; receptor complex Molecular Function: alpha-actinin binding; calcium activated cation channel activity; calcium channel activity; calcium ion binding; calcium-activated potassium channel activity; cation channel activity; cation transmembrane transporter activity; cytoskeletal protein binding; identical protein binding; muscle alpha-actinin binding; protein binding; sodium channel activity; sour taste receptor activity Biological Process: cation transport; detection of chemical stimulus involved in sensory perception of sour taste; detection of mechanical stimulus; sensory perception of sour taste; smoothened signaling pathway
Research Articles on PKD2L1	**1.** Opening TRPP2 (PKD2L1) requires the transfer of gating charges.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
