Fatty Acid Transport Protein 4 (FATP4) ELISA Kit for Human

PRODUCT OVERVIEW

Product Name	Fatty Acid Transport Protein 4 (FATP4), ELISA Kit
Full Product Name	Human Fatty Acid Transport Protein 4 (FATP4) ELISA Kit
Product Gene Name	FATP4 elisa kit
Species Reactivity	Human
Preparation and Storage	Store all reagents at 2-8 degree C
Related Product Information for FATP4 elisa kit	MBS061359 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Fatty Acid Transport Protein 4 (FATP4) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing FATP4. The ELISA analytical biochemical technique of the MBS061359 kit is based on FATP4 antibody-FATP4 antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect FATP4 antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, FATP4. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of FATP4 elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
