SMARCD3 Antibody – Mouse Monoclonal

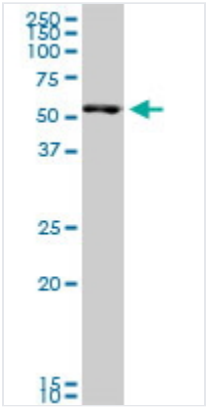

PRODUCT OVERVIEW

Product Name	SMARCD3, Monoclonal Antibody
Full Product Name	SMARCD3 (SWI/SNF Related, Matrix Associated, Actin Dependent Regulator of chromatin, Subfamily d, Member 3, BAF60C, CRACD3, MGC111010, Rsc6p) (Biotin)
Product Gene Name	anti-SMARCD3 antibody
Product Synonym Names	SWI/SNF Related; Matrix Associated; Actin Dependent Regulator of chromatin; Subfamily d; Member 3; BAF60C; CRACD3; MGC111010; Rsc6p
Clonality	Monoclonal
Isotype	IgG2a,k
Clone Number	5B6
Host	Mouse
Form/Format	Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with Biotin.
Purity/Purification	Purified
Specificity	Recognizes SMARCD3.
Preparation and Storage	Store product at 4 degree C if to be used immediately within two weeks. For long-term storage, aliquot to avoid repeated freezing and thawing and store at -20 degree C. Aliquots are stable at -20 degree C for 12 months after receipt. Dilute required amount only prior to immediate use. Further dilutions can be made in assay buffer. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap.
Molecular Weight	53,687 Da
OMIM	601737
3D Structure	ModBase 3D Structure for Q6STE5
Immunogen	SMARCD3 (NP_001003801, 385aa-483aa) partial recombinant protein with GST tag. MW of the GST tag alone is 26kD.
Immunogen Sequence	ISALDSKIHETIESINQLKIQRDFMLSFSRDPKGYVQDLLRSQSRDLKVMTDVAGNPEEERRAEFYHQPWSQEAVSRYFYCKIQQRRQELEQSLVVRNT
Conjugate	Biotin
Product Categories/Family for anti-SMARCD3 antibody	Antibodies; Matrix Metalloproteinases
Applications Tested/Suitable for anti-SMARCD3 antibody	Western Blot (WB)
Application Notes for anti-SMARCD3 antibody	Applications are based on unconjugated antibody.

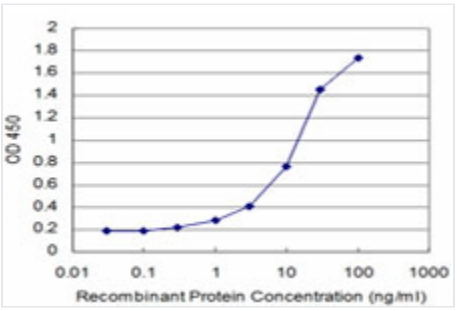

Related Product Information for anti-SMARCD3 antibody	The protein encoded by this gene is a member of the SWI/SNF family of proteins, whose members display helicase and ATPase activities and which are thought to regulate transcription of certain genes by altering the chromatin structure around those genes. The encoded protein is part of the large ATP-dependent chromatin remodeling complex SNF/SWI and has sequence similarity to the yeast Swp73 protein. Multiple alternatively spliced transcript variants have been found for this gene, but the biological validity of some variants has not been determined. [provided by RefSeq]
Other Notes	Small volumes of anti-SMARCD3 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for SMARCD3 purchase	MBS6172445 is an antibody targeting SMARCD3. Also known as SMARCD3 (SWI/SNF Related, Matrix Associated, Actin Dependent Regulator of chromatin, Subfamily d, Member 3, BAF60C, CRACD3, MGC111010, Rsc6p) (Biotin). Host: Mouse.

Western Blot (WB) of anti-SMARCD3 antibody
SMARCD3 monoclonal antibody (M04), clone 5B6 Western Blot analysis of SMARCD3 expression in NIH/3T3 (Cat # L018V1).

Western Blot (WB) of anti-SMARCD3 antibody
SMARCD3 monoclonal antibody (M04), clone 5B6. Western Blot analysis of SMARCD3 expression in PC-12.

Testing Data of anti-SMARCD3 antibody
Detection limit for recombinant GST tagged SMARCD3 is approximately 0.3ng/ml as a capture antibody.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for SMARCD3. It may not necessarily be applicable to this product.

NCBI GI #	51477702
NCBI GeneID	6604
NCBI Accession #	NP_001003801
UniProt Primary Accession #	Q6STE5
UniProt Secondary Accession #	Q2YD86; Q75MJ2; Q75MR8; Q92926; Q9BUH1; D3DX10
UniProt Related Accession #	Q6STE5

GenBank Nucleotide #	NM_001003801
NCBI Official Full Name	SWI/SNF-related matrix-associated actin-dependent regulator of chromatin subfamily D member 3 isoform 2
NCBI Official Synonym Full Names	SWI/SNF related, matrix associated, actin dependent regulator of chromatin, subfamily d, member 3
NCBI Official Symbol	SMARCD3
NCBI Official Synonym Symbols	Rsc6p; BAF60C; CRACD3
UniProt Protein Name	SWI/SNF-related matrix-associated actin-dependent regulator of chromatin subfamily D member 3
UniProt Synonym Protein Names	60 kDa BRG-1/Brm-associated factor subunit C; BRG1-associated factor 60C; BAF60C
Protein Family	SWI/SNF-related matrix-associated actin-dependent regulator of chromatin subfamily
UniProt Gene Name	SMARCD3
UniProt Synonym Gene Names	BAF60C; BAF60C
UniProt Entry Name	SMRD3_HUMAN
NCBI Protein Information	SWI/SNF-related matrix-associated actin-dependent regulator of chromatin subfamily D member 3; 60 kDa BRG-1/Brm-associated factor subunit C; BRG1-associated factor 60C; SWI/SNF complex 60 kDa subunit C; SWI/SNF related, matrix associated, actin dependent
UniProt Comments for SMARCD3	SMARCD3: Plays a role in ATP dependent nucleosome remodeling by SMARCA4 containing complexes. Stimulates nuclear receptor mediated transcription. Belongs to the neural progenitors-specific chromatin remodeling complex (npBAF complex) and the neuron- specific chromatin remodeling complex (nBAF complex). During neural development a switch from a stem/progenitor to a post- mitotic chromatin remodeling mechanism occurs as neurons exit the cell cycle and become committed to their adult state. The transition from proliferating neural stem/progenitor cells to post-mitotic neurons requires a switch in subunit composition of the npBAF and nBAF complexes. As neural progenitors exit mitosis and differentiate into neurons, npBAF complexes which contain ACTL6A/BAF53A and PHF10/BAF45A, are exchanged for homologous alternative ACTL6B/BAF53B and DPF1/BAF45B or DPF3/BAF45C subunits in neuron-specific complexes (nBAF). The npBAF complex is essential for the self-renewal/proliferative capacity of the multipotent neural stem cells. The nBAF complex along with CREST plays a role regulating the activity of genes essential for dendrite growth. Belongs to the SMARCD family. 2 isoforms of the human protein are produced by alternative splicing. Protein type: Transcription, coactivator/corepressor; Nuclear receptor co-regulator Chromosomal Location of Human Ortholog: 7q35-q36 Cellular Component: nucleoplasm; SWI/SNF complex; cytoplasm; nuclear chromatin; nucleus Molecular Function: ligand-dependent nuclear receptor binding; protein binding; ligand-dependent nuclear receptor transcription coactivator activity; transcription coactivator activity; transcription factor binding; receptor binding; nuclear hormone receptor binding Biological Process: regulation of transcription from RNA polymerase II promoter; chromatin remodeling; positive regulation of neuroblast proliferation; muscle cell differentiation; nucleosome disassembly; transcription, DNA-dependent; positive regulation of transcription, DNA-dependent; regulation of protein binding; cellular lipid metabolic process
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.

Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
