MAX Antibody – Mouse Monoclonal

PRODUCT OVERVIEW

Product Name	MAX, Monoclonal Antibody
Full Product Name	MAX (Protein Max, Class D Basic Helix-loop-helix Protein 4, bHLHd4, Myc-associated Factor X, BHLHD4) (MaxLight 750)
Product Gene Name	anti-MAX antibody
Clonality	Monoclonal
Isotype	IgG2a,k
Clone Number	4E10-1A9
Host	Mouse
Species Reactivity	Human
Form/Format	Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with MaxLight750.
Purity/Purification	Purified by Protein A Affinity Chromatography.
Specificity	Recognizes human MAX.
Preparation and Storage	Store product at 4 degree C in the dark. DO NOT FREEZE! Stable at 4 degree C for 12 months after receipt as an undiluted liquid. Dilute required amo Caution: MaxLight750 conjugates are sensitive to light. For maximum recovery of product, centrifuge the original vial prior to removing the cap.
Molecular Weight	9,599 Da
Immunogen	Full length recombinant corresponding to aa1-151 from human MAX (AAH03525) with GST tag. MW of the GST tag alone is 26kD.
Immunogen Sequence	MSDNDDIEVESDADKRAHHNALERKRRDHIKDSFHSLRDSVPSLQGEKASRAQILDKATEYIQYMRRKNHTHQQDIDDLKRQNALLEQQVRALEKARSSA
Conjugate	MaxLight750
Product Categories/Family for anti-MAX antibody	Antibodies; Transcription Factors
Applications Tested/Suitable for anti-MAX antibody	FLISA, Immunofluorescence (IF), Western Blot (WB)
Application Notes for anti-MAX antibody	IF: 10ug/ml Applications are based on unconjugated antibody.
Related Product Information for anti-MAX antibody	MBS6233802 is an antibody targeting MAX. Also known as MAX (Protein Max, Class D Basic Helix-loop-helix Protein 4, bHLHd4, Myc-associated Fact
Other Notes	Small volumes of anti-MAX antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessa the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for MAX. It may not necessarily be applicable to this product.

NCBI GI #	13097617
NCBI GeneID	4149
NCBI Accession #	BC003525
NCBI Related Accession #	AAH03525
UniProt Secondary Accession #	P25912; P52163; Q14803; Q96CY8; A6NH73; A8K265; A8K4G4; A8K824
UniProt Related Accession #	P61244
NCBI Official Full Name	Homo sapiens MYC associated factor X, mRNA
NCBI Official Synonym Full Names	MYC associated factor X
NCBI Official Symbol	MAX
NCBI Official Synonym Symbols	bHLHd4
Protein Family	Protein max
NCBI Protein Information	protein max
NCBI Summary for MAX	The protein encoded by this gene is a member of the basic helix-loop-helix leucine zipper (bHLHZ) family of transcription factors. It is able to form homodimers and heterodimers with other family members, which include Mad, Mxi1 and Myc. Myc is an oncoprotein implicated in cell proliferation, differentiation and apoptosis. The homodimers and heterodimers compete for a common DNA target site (the E box) and rearrangement among these dimer forms provides a complex system of transcriptional regulation. Mutations of this gene have been reported to be associated with hereditary pheochromocytoma. A pseudogene of this gene is located on the long arm of chromosome 7. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Aug 2012]
Research Articles on MAX	**1.** The introduction of wild-type MAX cDNA into PC12 cells significantly decreased MYC's ability to bind to canonical E-boxes, while pathogenic MAX proteins were not able to fully repress MYC activity. Further clinical and molecular evaluation of variant carriers corroborated the results obtained with the functional assessment.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
