STK11 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	STK11, Polyclonal Antibody
Full Product Name	STK11, CT (Serine/Threonine-protein Kinase 11, Serine/Threonine-protein Kinase LKB1, Renal Carcinoma Antigen NY-REN-19, LKB1, PJS)
Product Gene Name	anti-STK11 antibody
Product Synonym Names	Anti -STK11, CT (Serine/Threonine-protein Kinase 11, Serine/Threonine-protein Kinase LKB1, Renal Carcinoma Antigen NY-REN-19, LKB1, PJS)
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human
Form/Format	Supplied as a liquid in PBS, 0.09% sodium azide.
Purity/Purification	Affinity Purified Purified by Protein G affinity chromatography.
Specificity	Recognizes human STK11.
Preparation and Storage	May be stored at 4 degree C for short-term only. Aliquot to avoid repeated freezing and thawing. Store at -20 degree C. Aliquots are stable for at least 12 months. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap.
Molecular Weight	48,636 Da
Chromosome Location	Chromosome: 19; NC_000019.9 (1205798..1228434). Location: 19p13.3
OMIM	175200
3D Structure	ModBase 3D Structure for Q15831
Immunogen	Synthetic peptide selected from the C-terminal region of human STK11 (KLH).
Product Categories/Family for anti-STK11 antibody	Antibodies; Abs to Protein Kinases
Applications Tested/Suitable for anti-STK11 antibody	ELISA (EL/EIA), Immunohistochemistry (IHC)
Application Notes for anti-STK11 antibody	Suitable for use in ELISA and Immunohistochemistry. Dilution: ELISA: 1:1,000 Immunohistochemistry: 1:50-1:100
Related Product Information for anti-STK11 antibody	STK11, is a member of the serine/threonine kinase family, regulates cell polarity and functions as a tumor suppressor. Mutations in STK11 have been associated with Peutz-Jeghers syndrome, an autosomal dominant disorder characterized by the growth of polyps in the gastrointestinal tract, pigmented macules on the skin and mouth, and other neoplasms.
Other Notes	Small volumes of anti-STK11 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for STK11 purchase	MBS628688 is an antibody targeting STK11. Also known as STK11, CT (Serine/Threonine-protein Kinase 11, Serine/Threonine-protein Kinase LKB1, Renal Carcinoma Antigen NY-REN-19, LKB1, PJS). Reactive in Human. Host: Rabbit.

Immunohistochemistry (IHC) of anti-STK11 antibody
Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated. BC = breast carcinoma; HC = hepatocarcinoma.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for STK11. It may not necessarily be applicable to this product.

NCBI GI #	4507271
NCBI GeneID	6794
NCBI Accession #	NP_000446.1
UniProt Primary Accession #	Q15831
UniProt Secondary Accession #	B2RBX7
UniProt Related Accession #	Q15831; Q59FA7; Q5ZEZ1; Q9HBS3; Q9NS52
GenBank Nucleotide #	NM_000455.4
NCBI Official Full Name	serine/threonine-protein kinase 11
NCBI Official Synonym Full Names	serine/threonine kinase 11
NCBI Official Symbol	STK11
NCBI Official Synonym Symbols	PJS; LKB1
UniProt Protein Name	Serine/threonine-protein kinase 11
UniProt Synonym Protein Names	Renal carcinoma antigen NY-REN-19; Serine/threonine-protein kinase LKB1
Protein Family	Serine/threonine-protein kinase
UniProt Gene Name	STK11
UniProt Synonym Gene Names	LKB1; PJS
UniProt Entry Name	STK11_HUMAN
NCBI Protein Information	serine/threonine-protein kinase 11; polarization-related protein LKB1; renal carcinoma antigen NY-REN-19; serine/threonine-protein kinase LKB1
NCBI Summary for STK11	This gene, which encodes a member of the serine/threonine kinase family, regulates cell polarity and functions as a tumor suppressor. Mutations in this gene have been associated with Peutz-Jeghers syndrome, an autosomal dominant disorder characterized by the growth of polyps in the gastrointestinal tract, pigmented macules on the skin and mouth, and other neoplasms. Alternate transcriptional splice variants of this gene have been observed but have not been thoroughly characterized. [provided by RefSeq]

UniProt Comments for STK11	LKB1: a S/T protein kinase of the CAMKL family. A tumor suppressor that helps control cell structure, polarity, apoptosis and energy homeostasis. Phosphorylates AGS3 (activator of G-protein signaling 3) GPR domains, regulating the interaction of GPR-containing proteins with G-proteins. A cytosolic protein complex comprised of LKB1, the pseudokinase STRAD, and the MO25 scaffold protein. Activates AMPK and several related protein kinases. AMPK plays a predominant role as the master regulator of cellular energy homeostasis, controlling downstream effectors that regulate cell growth and apoptosis in response to cellular ATP concentrations. The Lkb1/Strad/Mo25 complex can polarize single epithelial cells, leading to the formation of a brush border containing microvilli on the apical surface. Mutation in the corresponding gene causes Peutz-Jeghers syndrome (PJS), an autosomal dominant disorder characterized by benign GI tract polyps and dark skin lesions of the mouth, hands and feet. A variety of other LKB1 gene mutations have been associated with the formation of sporadic cancers in several tissues. Protein type: Autophagy; Protein kinase, Ser/Thr (non-receptor); Protein kinase, CAMK; EC 2.7.11.1; Tumor suppressor; Kinase, protein; CAMK group; CAMKL family; LKB subfamily Chromosomal Location of Human Ortholog: 19p13.3 Cellular Component: membrane; mitochondrion; cytoplasm; nucleus; cytosol Molecular Function: protein serine/threonine kinase activity; protein binding; p53 binding; magnesium ion binding; protein complex binding; protein kinase activator activity; LRR domain binding; ATP binding Biological Process: Golgi localization; response to glucagon stimulus; protein heterooligomerization; protein amino acid autophosphorylation; Wnt receptor signaling pathway through beta-catenin; glucose homeostasis; response to lipid; protein amino acid phosphorylation; T cell receptor signaling pathway; anoikis; positive regulation of gluconeogenesis; negative regulation of cell proliferation; regulation of fatty acid biosynthetic process; vasculature development; tissue homeostasis; regulation of cell growth; cell cycle arrest; positive thymic T cell selection; regulation of Wnt receptor signaling pathway; positive regulation of transforming growth factor beta receptor signaling pathway; regulation of protein kinase B signaling cascade; positive regulation of peptidyl-tyrosine phosphorylation; axonogenesis; establishment of cell polarity; energy reserve metabolic process; insulin receptor signaling pathway; activation of protein kinase activity; autophagy; positive regulation of axonogenesis; response to ionizing radiation; negative regulation of cell growth; response to DNA damage stimulus; spermatid development Disease: Pancreatic Cancer; Testicular Germ Cell Tumor; Peutz-jeghers Syndrome

Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
