HSPC142 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	HSPC142, Polyclonal Antibody
Full Product Name	HSPC142, NT (BABAM1, C19orf62, MERIT40, NBA1, BRISC and BRCA1-A complex member 1, Mediator of RAP80 interactions and targeting subunit of 40kD, New component of the BRCA1-A complex) (MaxLight 405)
Product Gene Name	anti-HSPC142 antibody
Product Synonym Gene Name	MERIT40
Product Synonym Names	BABAM1; C19orf62; MERIT40; NBA1; BRISC and BRCA1-A complex member 1; Mediator of RAP80 interactions and targeting subunit of 40kD; New component of the BRCA1-A complex
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human
Form/Format	Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with MaxLight405.
Purity/Purification	Purified by Protein A Affinity Chromatography.
Preparation and Storage	Store product at 4 degree C in the dark. DO NOT FREEZE! Stable at 4 degree C for 12 months after receipt as an undiluted liquid. Dilute required amount only prior to immediate use. Further dilutions can be made in assay buffer. Caution: MaxLight405 conjugates are sensitive to light. For maximum recovery of product, centrifuge the original vial prior to removing the cap.
Molecular Weight	36kDa
OMIM	612766
3D Structure	ModBase 3D Structure for Q9NWV8
Immunogen	HSPC142 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 16-45 amino acids from the N-terminal region of human HSPC142.
Conjugate	MaxLight405
Note	Preservative Free
Product Categories/Family for anti-HSPC142 antibody	Antibodies; Heat Shock Proteins
Applications Tested/Suitable for anti-HSPC142 antibody	Immunohistochemistry (IHC), FLISA, Western Blot (WB)
Application Notes for anti-HSPC142 antibody	IHC: 1:50-100 FLISA: 1:1,000 WB: 1:100-500 Applications are based on unconjugated antibody.

Related Product Information for anti-HSPC142 antibody	HSPC142 is a component of the BRCA1-A complex, a complex that specifically recognizes 'Lys-63'-linked ubiquitinated histones H2A and H2AX at DNA lesions sites, leading to target the BRCA1-BARD1 heterodimer to sites of DNA damage at double-strand breaks (DSBs). The BRCA1-A complex also possesses deubiquitinase activity that specifically removes 'Lys-63'-linked ubiquitin on histones H2A and H2AX. In the BRCA1-A complex, it is required for the complex integrity and its localization at DSBs. HSPC142 probably also plays a role as a component of the BRISC complex, a multiprotein complex that specifically cleaves 'Lys-63'-linked ubiquitin. In these 2 complexes, it is probably required to maintain the stability of BRE/BRCC45 and help the 'Lys-63'-linked deubiquitinase activity mediated by BRCC3/BRCC36. component
Product References and Citations for anti-HSPC142 antibody	Solyom, S., et al. Breast Cancer Res. Treat. 120(1):165-168(2010). Cooper, E.M., et al. EMBO J. 28(6):621-631(2009). Olsen, J.V., et al. Cell 127(3):635-648(2006).
Other Notes	Small volumes of anti-HSPC142 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for HSPC142 purchase	MBS6308743 is an antibody targeting HSPC142. Also known as HSPC142, NT (BABAM1, C19orf62, MERIT40, NBA1, BRISC and BRCA1-A complex member 1, Mediator of RAP80 interactions and targeting subunit of 40kD, New component of the BRCA1-A complex) (MaxLight 405). Reactive in Human. Host: Rabbit.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for HSPC142. It may not necessarily be applicable to this product.

NCBI GI #	75709192
NCBI GeneID	29086
NCBI Accession #	NP_054892
UniProt Primary Accession #	Q9NWV8
UniProt Related Accession #	Q9NWV8
GenBank Nucleotide #	NM_014173
NCBI Official Full Name	BRISC and BRCA1-A complex member 1 isoform 1
NCBI Official Synonym Full Names	BRISC and BRCA1 A complex member 1
NCBI Official Symbol	BABAM1
NCBI Official Synonym Symbols	NBA1; HSPC142; MERIT40; C19orf62
UniProt Protein Name	BRISC and BRCA1-A complex member 1
UniProt Synonym Protein Names	Mediator of RAP80 interactions and targeting subunit of 40 kDa
UniProt Gene Name	BABAM1
UniProt Entry Name	BABA1_HUMAN
NCBI Protein Information	BRISC and BRCA1-A complex member 1

UniProt Comments for HSPC142	NBA1: a component of the BRCA1-A complex, a complex that specifically recognizes 'Lys-63'-linked ubiquitinated histones H2A and H2AX at DNA lesions sites, leading to target the BRCA1-BARD1 heterodimer to sites of DNA damage at double-strand breaks (DSBs). The BRCA1-A complex also possesses deubiquitinase activity that specifically removes 'Lys-63'-linked ubiquitin on histones H2A and H2AX. In the BRCA1-A complex, it is required for the complex integrity and its localization at DSBs. Probably also plays a role as a component of the BRISC complex, a multiprotein complex that specifically cleaves 'Lys-63'-linked ubiquitin. In these 2 complexes, it is probably required to maintain the stability of BRE/BRCC45 and help the 'Lys-63'-linked deubiquitinase activity mediated by BRCC3/BRCC36 component. The VWFA-like region is similar to the VWFA domain. Its presence reveals similarities between the structure of the 19S proteasome and the BRCA1-A complexes. Two alternatively spliced human isoforms have been reported. Protein type: DNA repair, damage Chromosomal Location of Human Ortholog: 19p13.11 Cellular Component: cytoplasm; nucleoplasm; nucleus Molecular Function: protein binding Biological Process: double-strand break repair; double-strand break repair via nonhomologous end joining; G2/M transition DNA damage checkpoint; positive regulation of DNA repair; response to ionizing radiation
Research Articles on HSPC142	**1.** Genetic variants in NBA1 may be an important genetic determinant of triple-negative breast cancer susceptibility.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
