SEPP1 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	SEPP1, Polyclonal Antibody
Full Product Name	SEPP1, ID (SEPP1, SELP, Selenoprotein P) (FITC)
Product Gene Name	anti-SEPP1 antibody
Product Synonym Names	SEPP1; SELP; Selenoprotein P
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human
Form/Format	Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with Fluorescein Isothiocyanate (FITC).
Purity/Purification	Purified by Protein A Affinity Chromatography.
Preparation and Storage	Store product at 4 degree C if to be used immediately within two weeks. For long-term storage, aliquot to avoid repeated freezing and thawing and store at -20 degree C. Aliquots are stable at -20 degree C for 12 months after receipt. Dilute required amount only prior to immediate use. Further dilutions can be made in assay buffer. Caution: FITC conjugates are sensitive to light. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap.
Molecular Weight	43,174 Da
3D Structure	ModBase 3D Structure for P49908
Immunogen	SEPP1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 232-262 amino acids from the Central region of human SEPP1.
Conjugate	FITC
Note	Preservative Free
Special Handling	Light sensitive
Product Categories/Family for anti-SEPP1 antibody	Antibodies; Selenoprotein
Applications Tested/Suitable for anti-SEPP1 antibody	Western Blot (WB), FLISA
Application Notes for anti-SEPP1 antibody	WB: 1:100-500 FLISA: 1:1,000 Applications are based on unconjugated antibody.
Related Product Information for anti-SEPP1 antibody	This gene encodes a selenoprotein containing multiple selenocysteine (Sec) residues, which are encoded by the UGA codon that normally signals translation termination. The 3' UTR of selenoprotein genes have a common stem-loop structure, the sec insertion sequence (SECIS), which is necessary for the recognition of UGA as a Sec codon rather than as a stop signal. This selenoprotein is an extracellular glycoprotein, and is unusual in that it contains 10 Sec residues per polypeptide. It is a heparin-binding protein that appears to be associated with endothelial cells, and has been implicated to function as an antioxidant in the extracellular space. Several transcript variants, encoding either the same or different isoform, have been found for this gene.
Product References and Citations for anti-SEPP1 antibody	Sun, W., et al. Br. J. Nutr. 104(9):1283-1287(2010). Roman, M., et al. Transl Res 156(4):242-250(2010). Meplan, C., et al. Carcinogenesis 31(6):1074-1079(2010). Davila, S., et al. Genes Immun. 11(3):232-238(2010). Takemoto, A.S., et al. Ethn Dis 20 (1 SUPPL 1), S1-S925 (2010).

Other Notes	Small volumes of anti-SEPP1 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for SEPP1 purchase	MBS6346111 is an antibody targeting SEPP1. Also known as SEPP1, ID (SEPP1, SELP, Selenoprotein P) (FITC). Reactive in Human. Host: Rabbit.

Western Blot (WB) of anti-SEPP1 antibody
SEPP1 Antibody (Center) western blot analysis in MDA-MB453 cell line lysates (35ug/lane).This demonstrates the SEPP1 antibody detected the SEPP1 protein (arrow).

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for SEPP1. It may not necessarily be applicable to this product.

NCBI GI #	148277018
NCBI GeneID	6414
NCBI Accession #	NP_001078955.1
NCBI Related Accession #	NP_005401.3
UniProt Primary Accession #	P49908
UniProt Secondary Accession #	Q6PD59; Q6PI43; Q6PI87; Q6PJF9
UniProt Related Accession #	P49908
GenBank Nucleotide #	NM_001085486.2
NCBI Official Full Name	selenoprotein P isoform 1
NCBI Official Synonym Full Names	selenoprotein P
NCBI Official Symbol	SELENOP
NCBI Official Synonym Symbols	SeP; SELP; SEPP; SEPP1
UniProt Protein Name	Selenoprotein P
Protein Family	Selenoprotein
UniProt Gene Name	SELENOP
UniProt Synonym Gene Names	SeP
NCBI Protein Information	selenoprotein P

NCBI Summary for SEPP1	This gene encodes a selenoprotein that is predominantly expressed in the liver and secreted into the plasma. This selenoprotein is unique in that it contains multiple selenocysteine (Sec) residues per polypeptide (10 in human), and accounts for most of the selenium in plasma. It has been implicated as an extracellular antioxidant, and in the transport of selenium to extra-hepatic tissues via apolipoprotein E receptor-2 (apoER2). Mice lacking this gene exhibit neurological dysfunction, suggesting its importance in normal brain function. Sec is encoded by the UGA codon, which normally signals translation termination. The 3' UTRs of selenoprotein mRNAs contain a conserved stem-loop structure, designated the Sec insertion sequence (SECIS) element, that is necessary for the recognition of UGA as a Sec codon, rather than as a stop signal. The mRNA for this selenoprotein contains two SECIS elements. Alternatively spliced transcript variants have been found for this gene. [provided by RefSeq, Feb 2017]
UniProt Comments for SEPP1	Might be responsible for some of the extracellular antioxidant defense properties of selenium or might be involved in the transport of selenium. May supply selenium to tissues such as brain and testis.
Research Articles on SEPP1	**1.** Results indicate a diversity of RNA elements conducting multiple occurrences of UGA redefinition to control the synthesis of full-length and truncated selenoprotein P (SELENOP) isoforms.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
