ANAPC4 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	ANAPC4, Polyclonal Antibody
Full Product Name	ANAPC4 (Anaphase-promoting Complex Subunit 4, APC4, Cyclosome Subunit 4) (HRP)
Product Gene Name	anti-ANAPC4 antibody
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human
Form/Format	Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with Horseradish Peroxidase (HRP).
Purity/Purification	Purified by Protein A Affinity Chromatography.
Specificity	Recognizes human ANAPC4.
Preparation and Storage	Store product at 4 degree C if to be used immediately within two weeks. For long-term storage, aliquot to avoid repeated freezing and thawing and stor
Molecular Weight	92,216 Da
OMIM	606947
3D Structure	ModBase 3D Structure for Q9UJX5
Immunogen	Full length human ANAPC4, aa1-808 (NP_037499.2).
Immunogen Sequence	MLRFPTCFPSFRVVGEKQLPQEIIFLVWSPKRDLIALANTAGEVLLHRLASFHRVWSFPPNENTGKEVTCLAWRPDGKLLAFALADTKKIVLCDVEKPESLH
Conjugate	HRP
Note	Preservative Free
Product Categories/Family for anti-ANAPC4 antibody	Antibodies; Transcription Factors
Applications Tested/Suitable for anti-ANAPC4 antibody	Western Blot (WB)
Application Notes for anti-ANAPC4 antibody	Applications are based on unconjugated antibody.
Related Product Information for anti-ANAPC4 antibody	A large protein complex, termed the anaphase-promoting complex (APC), or the cyclosome, promotes metaphase-anaphase transition by ubiquitinating
Other Notes	Small volumes of anti-ANAPC4 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If nece

Searchable Terms for ANAPC4 purchase	MBS6369807 is an antibody targeting ANAPC4. Also known as ANAPC4 (Anaphase-promoting Complex Subunit 4, APC4, Cyclosome Subunit 4) (HRI

Western Blot (WB) of anti-ANAPC4 antibody
Western Blot analysis of ANAPC4 expression in transfected 293T cell line by ANAPC4 polyclonal antibody. Lane 1: ANAPC4 transfected lysate (92.1kD). Lane 2: Non-transfected lysate.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for ANAPC4. It may not necessarily be applicable to this product.

NCBI GI #	41327749
NCBI GeneID	29945
NCBI Accession #	NP_037499.2
UniProt Primary Accession #	Q9UJX5
UniProt Secondary Accession #	Q6PCC6; Q9NSH6; A8K8H1; E9PCR4
UniProt Related Accession #	Q9UJX5
GenBank Nucleotide #	NM_013367
NCBI Official Full Name	anaphase-promoting complex subunit 4 isoform 2
NCBI Official Synonym Full Names	anaphase promoting complex subunit 4
NCBI Official Symbol	ANAPC4
NCBI Official Synonym Symbols	APC4
UniProt Protein Name	Anaphase-promoting complex subunit 4
UniProt Synonym Protein Names	Cyclosome subunit 4
UniProt Gene Name	ANAPC4
UniProt Synonym Gene Names	APC4; APC4
UniProt Entry Name	APC4_HUMAN
NCBI Protein Information	anaphase-promoting complex subunit 4; cyclosome subunit 4
NCBI Summary for ANAPC4	A large protein complex, termed the anaphase-promoting complex (APC), or the cyclosome, promotes metaphase-anaphase transition by ubiquitinating its specific substrates such as mitotic cyclins and anaphase inhibitor, which are subsequently degraded by the 26S proteasome. Biochemical studies have shown that the vertebrate APC contains eight subunits. The composition of the APC is highly conserved in organisms from yeast to humans. The exact function of this gene product is not known. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Nov 2013]

UniProt Comments for ANAPC4	APC4: Component of the anaphase promoting complex/cyclosome (APC/C), a cell cycle-regulated E3 ubiquitin ligase that controls progression through mitosis and the G1 phase of the cell cycle. The APC/C complex acts by mediating ubiquitination and subsequent degradation of target proteins: it mainly mediates the formation of 'Lys-11'-linked polyubiquitin chains and, to a lower extent, the formation of 'Lys-48'- and 'Lys-63'-linked polyubiquitin chains. Belongs to the APC4 family. 2 isoforms of the human protein are produced by alternative splicing. Protein type: Ubiquitin conjugating system Chromosomal Location of Human Ortholog: 4p15.2 Cellular Component: nucleoplasm; anaphase-promoting complex; nucleus; cytosol Molecular Function: protein binding; ubiquitin-protein ligase activity; protein phosphatase binding Biological Process: positive regulation of ubiquitin-protein ligase activity during mitotic cell cycle; mitosis; negative regulation of ubiquitin-protein ligase activity during mitotic cell cycle; regulation of ubiquitin-protein ligase activity during mitotic cell cycle; cell division; anaphase-promoting complex-dependent proteasomal ubiquitin-dependent protein catabolic process; mitotic cell cycle spindle assembly checkpoint; mitotic cell cycle
Research Articles on ANAPC4	**1.** Inactivation and disassembly of the anaphase-promoting complex during human cytomegalovirus infection is associated with degradation of the APC5 and APC4 subunits and does not require UL97-mediated phosphorylation of Cdh1.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
