CTTN Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	CTTN, Polyclonal Antibody
Full Product Name	CTTN (Src Substrate Cortactin,, Amplaxin, Oncogene EMS1, FLJ34459) (HRP)
Product Gene Name	anti-CTTN antibody
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human
Form/Format	Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with Horseradish Peroxidase (HRP).
Purity/Purification	Purified by Protein A Affinity Chromatography.
Specificity	Recognizes human CTTN.
Preparation and Storage	Store product at 4 degree C if to be used immediately within two weeks. For long-term storage, aliquot to avoid repeated freezing and thawing and stor
OMIM	164765
3D Structure	ModBase 3D Structure for Q14247
Immunogen	Full length human CTTN, aa1-513 (NP_612632.1).
Immunogen Sequence	MWKASAGHAVSIAQDDAGADDWETDPDFVNDVSEKEQRWGAKTVQGSGHQEHINIHKLRENVFQEHQTLKEKELETGPKASHGYGGKFGVEQDRMDK
Conjugate	HRP
Note	Preservative Free
Product Categories/Family for anti-CTTN antibody	Antibodies; Actin Binding Proteins
Applications Tested/Suitable for anti-CTTN antibody	Western Blot (WB)
Application Notes for anti-CTTN antibody	Applications are based on unconjugated antibody.
Related Product Information for anti-CTTN antibody	Contributes to the organization of the actin cytoskeleton and cell structure. Plays a role in the regulation of cell migration. Plays a role in the invasivenes
Other Notes	Small volumes of anti-CTTN antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necess

Searchable Terms for CTTN purchase	MBS6375098 is an antibody targeting CTTN. Also known as CTTN (Src Substrate Cortactin,, Amplaxin, Oncogene EMS1, FLJ34459) (HRP). Reactive

Western Blot (WB) of anti-CTTN antibody
Western Blot analysis of CTTN expression in transfected 293T cell line by CTTN polyclonal antibody. Lane 1: CTTN transfected lysate (57.5kD). Lane 2: Non-transfected lysate.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for CTTN. It may not necessarily be applicable to this product.

NCBI GI #	20357556
NCBI GeneID	2017
NCBI Accession #	NP_612632.1
UniProt Primary Accession #	Q14247
UniProt Related Accession #	Q14247
GenBank Nucleotide #	NM_138565.1
NCBI Official Full Name	src substrate cortactin isoform b
NCBI Official Synonym Full Names	cortactin
NCBI Official Symbol	CTTN
NCBI Official Synonym Symbols	EMS1
UniProt Protein Name	Src substrate cortactin
UniProt Synonym Protein Names	Amplaxin; Oncogene EMS1
Protein Family	Src substrate cortactin
UniProt Gene Name	CTTN
UniProt Synonym Gene Names	EMS1
UniProt Entry Name	SRC8_HUMAN
NCBI Protein Information	src substrate cortactin
NCBI Summary for CTTN	This gene is overexpressed in breast cancer and squamous cell carcinomas of the head and neck. The encoded protein is localized in the cytoplasm and in areas of the cell-substratum contacts. This gene has two roles: (1) regulating the interactions between components of adherens-type junctions and (2) organizing the cytoskeleton and cell adhesion structures of epithelia and carcinoma cells. During apoptosis, the encoded protein is degraded in a caspase-dependent manner. The aberrant regulation of this gene contributes to tumor cell invasion and metastasis. Three splice variants that encode different isoforms have been identified for this gene. [provided by RefSeq, May 2010]

UniProt Comments for CTTN	Cortactin: a cytoskeletal protein that that is involved in coordinating actin reorganization during cell movement. Localizes at the leading edge of lamellipodia during cell migration. Its amino-terminal acidic domain associates with the Arp2/3 and WASP complex at F-actin branches. The central region of the protein contains six repeats of 37 amino acids that are important in F-actin binding and cross-linking. The carboxy-terminus contains a proline-rich region and an SH3 domain that can interact with numerous scaffolding proteins, such as CortBP1 and Shank3. Cortactin may play a role in the organization of transmembrane receptors at postsynaptic densities (PSD) and tight junctions by linking scaffolding proteins to the actin network. It is degraded in a caspase-dependent manner during apoptosis. It is overexpressed in numerous cancers with poor patient prognosis. It may contribute to tumor cell invasion and metastasis. Two splice variant isoforms have been identified. Protein type: Motility/polarity/chemotaxis; Actin-binding; Cytoskeletal Chromosomal Location of Human Ortholog: 11q13 Cellular Component: cortical cytoskeleton; voltage-gated potassium channel complex; focal adhesion; dendritic spine; actin filament; coated pit; cell cortex; ruffle; growth cone; cytoskeleton; lamellipodium; cytoplasm; podosome Molecular Function: protein binding Biological Process: focal adhesion formation; intracellular protein transport; receptor-mediated endocytosis; positive regulation of actin filament polymerization; actin filament polymerization; actin cytoskeleton reorganization; cell motility involved in cell locomotion; regulation of axon extension; substrate-bound cell migration, cell extension; neurite morphogenesis
Research Articles on CTTN	**1.** We confirmed the link between CTTN overexpression and progression in a large cohort of patients with oral squamous cell carcinoma.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
