IDH3G Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	IDH3G, Polyclonal Antibody
Full Product Name	IDH3G (Isocitrate Dehydrogenase [NAD] Subunit gamma, Mitochondrial, Isocitric Dehydrogenase Subunit gamma, NAD(+)-specific ICDH Subunit gam
Product Gene Name	anti-IDH3G antibody
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human, Mouse
Form/Format	Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with MaxLight490.
Purity/Purification	Purified by Protein A Affinity Chromatography.
Specificity	Recognizes human IDH3G. Species Crossreactivity: mouse.
Preparation and Storage	Store product at 4 degree C in the dark. DO NOT FREEZE! Stable at 4 degree C for 12 months after receipt as an undiluted liquid. Dilute required amo
Molecular Weight	41,468 Da
OMIM	300089
3D Structure	ModBase 3D Structure for P51553
Immunogen	Full length human IDH3G, aa1-393 (NP_004126.1).
Immunogen Sequence	MALKVATVAGSAAKAVLGPALLCRPWEVLGAHEVPSRNIFSEQTIPPSAKYGGRHTVTMIPGDGIGPELMLHVKSVFRHACVPVDFEEVHVSSNADEEDIF
Conjugate	MaxLight490
Note	Preservative Free
Product Categories/Family for anti-IDH3G antibody	Antibodies; Enzymes
Applications Tested/Suitable for anti-IDH3G antibody	Western Blot (WB)
Application Notes for anti-IDH3G antibody	Applications are based on unconjugated antibody.
Related Product Information for anti-IDH3G antibody	MaxLight490 is a new Blue-Green photostable dye conjugate comparable to DyLight488, Alexa Fluor488 and offers better labeling efficiency, brighter i

Other Notes	Small volumes of anti-IDH3G antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If neces
Searchable Terms for IDH3G purchase	MBS6382041 is an antibody targeting IDH3G. Also known as IDH3G (Isocitrate Dehydrogenase [NAD] Subunit gamma, Mitochondrial, Isocitric Dehydr

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for IDH3G. It may not necessarily be applicable to this product.

NCBI GI #	4758582
NCBI GeneID	3421
NCBI Accession #	NP_004126.1
UniProt Primary Accession #	P51553
UniProt Secondary Accession #	Q9BUU5; E9PDD5
UniProt Related Accession #	P51553
GenBank Nucleotide #	NM_004135.2
NCBI Official Full Name	isocitrate dehydrogenase
NCBI Official Synonym Full Names	isocitrate dehydrogenase 3 (NAD+) gamma
NCBI Official Symbol	IDH3G
NCBI Official Synonym Symbols	H-IDHG
UniProt Protein Name	Isocitrate dehydrogenase [NAD] subunit gamma, mitochondrial
UniProt Synonym Protein Names	Isocitric dehydrogenase subunit gamma; NAD(+)-specific ICDH subunit gamma
Protein Family	Isocitrate dehydrogenase
UniProt Gene Name	IDH3G
UniProt Entry Name	IDH3G_HUMAN
NCBI Protein Information	isocitrate dehydrogenase [NAD] subunit gamma, mitochondrial; isocitrate dehydrogenase [NAD] subunit gamma, mitochondrial; IDH-gamma; NAD (H)-specific isocitrate dehydrogenase gamma subunit; NAD(+)-specific ICDH subunit gamma; NAD+-specific ICDH; isocitrat
NCBI Summary for IDH3G	Isocitrate dehydrogenases catalyze the oxidative decarboxylation of isocitrate to 2-oxoglutarate. These enzymes belong to two distinct subclasses, one of which utilizes NAD(+) as the electron acceptor and the other NADP(+). Five isocitrate dehydrogenases have been reported: three NAD(+)-dependent isocitrate dehydrogenases, which localize to the mitochondrial matrix, and two NADP(+)-dependent isocitrate dehydrogenases, one of which is mitochondrial and the other predominantly cytosolic. NAD(+)-dependent isocitrate dehydrogenases catalyze the allosterically regulated rate-limiting step of the tricarboxylic acid cycle. Each isozyme is a heterotetramer that is composed of two alpha subunits, one beta subunit, and one gamma subunit. The protein encoded by this gene is the gamma subunit of one isozyme of NAD(+)-dependent isocitrate dehydrogenase. This gene is a candidate gene for periventricular heterotopia. Several alternatively spliced transcript variants of this gene have been described, but only some of their full length natures have been determined. [provided by RefSeq, Jul 2008]

UniProt Comments for IDH3G	IDH3G: a enzyme that that catalyzes the oxidative decarboxylation of isocitrate to alpha-ketoglutarate (alpha-KG), requiring nicotinamide adenine dinucleotide (NAD) as a cofactor. The holoenzyme is a heterooligomer of subunits alpha, beta, and gamma in the apparent ratio of 2:1:1. IDH3 is a mitochondrial enzyme that functions in the Krebs cycle, which generates substrates for cellular respiration. Alpha-KG can exit the mitochondria and enter other cellular compartments where it is a cofactor for the dioxygenases that hydroxylate the transcription factor HIF and trigger its degradation by VHL. Since HIF turns on oncogenic pathways, IDH3 may have tumor suppressor activity. Two isoforms of the human protein are produced by alternative splicing. Protein type: Carbohydrate Metabolism - citrate (TCA) cycle; Oxidoreductase; EC 1.1.1.41; Mitochondrial Chromosomal Location of Human Ortholog: Xq28 Cellular Component: nucleoplasm; mitochondrion; mitochondrial matrix; nucleolus Molecular Function: magnesium ion binding; isocitrate dehydrogenase (NAD+) activity; NAD binding; ATP binding Biological Process: isocitrate metabolic process; cellular metabolic process; tricarboxylic acid cycle; carbohydrate metabolic process
Research Articles on IDH3G	**1.** active sites of the human NAD-IDH are shared between alpha and gamma subunits and between alpha and beta subunits
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
