JAM3 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	JAM3, Polyclonal Antibody
Full Product Name	JAM3 (Junctional Adhesion Molecule C, JAM-C, JAM-2, Junctional Adhesion Molecule 3, JAM-3, JAM3) (MaxLight 550)
Product Gene Name	anti-JAM3 antibody
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human, Mouse, Rat
Form/Format	Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with MaxLight550.
Purity/Purification	Purified by Protein A Affinity Chromatography.
Specificity	Recognizes JAM3. Species Crossreactivity: human, mouse, rat
Preparation and Storage	Store product at 4 degree C in the dark. DO NOT FREEZE! Stable at 4 degree C for 12 months after receipt as an undiluted liquid. Dilute required amount only prior to immediate use. Further dilutions can be made in assay buffer. Caution: MaxLight550 conjugates are sensitive to light. For maximum recovery of product, centrifuge the original vial prior to removing the cap.
Molecular Weight	29,223 Da
OMIM	606871
3D Structure	ModBase 3D Structure for Q9BX67
Immunogen	KLH conjugated synthetic peptide corresponding to aa261-295 at the C-terminal region of human JAM3.
Conjugate	MaxLight550
Note	Preservative Free
Product Categories/Family for anti-JAM3 antibody	Antibodies; Connexin; Junction Proteins
Applications Tested/Suitable for anti-JAM3 antibody	Western Blot (WB)
Application Notes for anti-JAM3 antibody	WB: 1:1000 Applications are based on unconjugated antibody.
Related Product Information for anti-JAM3 antibody	MBS6456774 is an antibody targeting JAM3. Also known as JAM3 (Junctional Adhesion Molecule C, JAM-C, JAM-2, Junctional Adhesion Molecule 3, JAM-3, JAM3) (MaxLight 550). Reactive in Human, Mouse, Rat. Host: Rabbit.
Product References and Citations for anti-JAM3 antibody	Arrate M.P., et al. J. Biol. Chem. 276:45826-45832(2001). Aurrand-Lions M.A., et al. Blood 98:3699-3707(2001). Santoso S., et al. J. Exp. Med. 196:679-691(2002). Phillips H.M., et al. Genomics 79:475-478(2002). Ota T., et al. Nat. Genet. 36:40-45(2004).
Other Notes	Small volumes of anti-JAM3 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for JAM3. It may not necessarily be applicable to this product.

NCBI GI #	328927057
NCBI GeneID	83700
NCBI Accession #	NP_001192258.1
UniProt Primary Accession #	Q9BX67
UniProt Secondary Accession #	Q8WWL8; Q96FL1; B3KWG9
UniProt Related Accession #	Q9BX67
GenBank Nucleotide #	NM_001205329.1
NCBI Official Full Name	junctional adhesion molecule C isoform 2
NCBI Official Synonym Full Names	junctional adhesion molecule 3
NCBI Official Symbol	JAM3
NCBI Official Synonym Symbols	JAMC; JAM-2; JAM-3; JAM-C
UniProt Protein Name	Junctional adhesion molecule C
UniProt Synonym Protein Names	JAM-2; Junctional adhesion molecule 3; JAM-3
Protein Family	Junctional adhesion molecule
UniProt Gene Name	JAM3
UniProt Synonym Gene Names	JAM-C; JAM-3
UniProt Entry Name	JAM3_HUMAN
NCBI Protein Information	junctional adhesion molecule C
NCBI Summary for JAM3	Tight junctions represent one mode of cell-to-cell adhesion in epithelial or endothelial cell sheets, forming continuous seals around cells and serving as a physical barrier to prevent solutes and water from passing freely through the paracellular space. The protein encoded by this immunoglobulin superfamily gene member is localized in the tight junctions between high endothelial cells. Unlike other proteins in this family, the this protein is unable to adhere to leukocyte cell lines and only forms weak homotypic interactions. The encoded protein is a member of the junctional adhesion molecule protein family and acts as a receptor for another member of this family. A mutation in an intron of this gene is associated with hemorrhagic destruction of the brain, subependymal calcification, and congenital cataracts. Alternative splicing results in multiple transcript variants.[provided by RefSeq, Apr 2011]

UniProt Comments for JAM3	JAM3: Participates in cell-cell adhesion. It is a counter- receptor for ITGAM, mediating leukocyte-platelet interactions and is involved in the regulation of transepithelial migration of polymorphonuclear neutrophils (PMN). The soluble form is a mediator of angiogenesis. Defects in JAM3 are the cause of hemorrhagic destruction of the brain with subependymal calcification and cataracts (HDBSCC). A syndrome characterized by congenital cataracts and severe brain abnormalities apparently resulting from hemorrhagic destruction of the brain tissue, including the cerebral white matter and basal ganglia. Patients manifest profound developmental delay, and other neurologic features included seizures, spasticity, and hyperreflexia. Brain imaging shows multifocal intraparenchymal hemorrhage with associated liquefaction and massive cystic degeneration, and calcification in the subependymal region and in brain tissue. Belongs to the immunoglobulin superfamily. 2 isoforms of the human protein are produced by alternative splicing. Protein type: Membrane protein, integral; Cell adhesion Chromosomal Location of Human Ortholog: 11q25 Cellular Component: Golgi apparatus; desmosome; extracellular space; tight junction; plasma membrane; integral to membrane Molecular Function: integrin binding; protein binding; protein homodimerization activity; protein heterodimerization activity Biological Process: myelination; adaptive immune response; extracellular matrix organization and biogenesis; axon regeneration; cell-matrix adhesion; transmission of nerve impulse; neutrophil homeostasis; leukocyte migration during inflammatory response; myeloid progenitor cell differentiation; establishment of cell polarity; angiogenesis; blood coagulation; leukocyte migration; spermatid development Disease: Hemorrhagic Destruction Of The Brain, Subependymal Calcification, And Cataracts

Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
