CAPZB Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	CAPZB, Polyclonal Antibody
Full Product Name	CAPZB, NT (F-actin-capping Protein Subunit beta, CapZ beta) (MaxLight 650)
Product Gene Name	anti-CAPZB antibody
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human
Form/Format	Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with MaxLight650.
Purity/Purification	Purified by Immunoaffinity chromatography.
Specificity	Recognizes human CAPZB.
Preparation and Storage	Store product at 4 degree C in the dark. DO NOT FREEZE! Stable at 4 degree C for 12 months after receipt as an undiluted liquid. Dilute required amount only prior to immediate use. Further dilutions can be made in assay buffer. Caution: MaxLight650 conjugates are sensitive to light. For maximum recovery of product, centrifuge the original vial prior to removing the cap.
Molecular Weight	– Da
3D Structure	ModBase 3D Structure for P47756
Immunogen	Synthetic peptide selected from the N-terminal region of human CAPZB (KLH).
Conjugate	MaxLight650
Note	Preservative Free
Product Categories/Family for anti-CAPZB antibody	Antibodies; Growth Factors; Cytokines
Applications Tested/Suitable for anti-CAPZB antibody	Western Blot (WB), FLISA
Application Notes for anti-CAPZB antibody	WB: 1:100-1:500 FLISA: 1:1,000 Applications are based on unconjugated antibody.
Related Product Information for anti-CAPZB antibody	MBS6466973 is an antibody targeting CAPZB. Also known as CAPZB, NT (F-actin-capping Protein Subunit beta, CapZ beta) (MaxLight 650). Reactive in Human. Host: Rabbit.
Product References and Citations for anti-CAPZB antibody	1. Wells, C.D., Cell 125(3), 535-548 (2006). 2. Bruneel, A., Proteomics 5(15), 3876-3884 (2005).
Other Notes	Small volumes of anti-CAPZB antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for CAPZB. It may not necessarily be applicable to this product.

NCBI GI #	4826659

NCBI GeneID	832
NCBI Accession #	NP_004921
UniProt Primary Accession #	P47756
UniProt Secondary Accession #	Q32Q68; Q5U0L4; Q8TB49; Q9NUC4
UniProt Related Accession #	P47756
GenBank Nucleotide #	NM_004930.4
NCBI Official Full Name	F-actin-capping protein subunit beta isoform 1
NCBI Official Synonym Full Names	capping protein (actin filament) muscle Z-line, beta
NCBI Official Symbol	CAPZB
NCBI Official Synonym Symbols	CAPB; CAPZ; CAPPB
UniProt Protein Name	F-actin-capping protein subunit beta
UniProt Synonym Protein Names	CapZ beta
Protein Family	F-actin-capping protein
UniProt Gene Name	CAPZB
NCBI Protein Information	F-actin-capping protein subunit beta
NCBI Summary for CAPZB	This gene encodes the beta subunit of the barbed-end actin binding protein, which belongs to the F-actin capping protein family. The capping protein is a heterodimeric actin capping protein that blocks actin filament assembly and disassembly at the fast growing (barbed) filament ends and functions in regulating actin filament dynamics as well as in stabilizing actin filament lengths in muscle and nonmuscle cells. A pseudogene of this gene is located on the long arm of chromosome 2. Multiple alternatively spliced transcript variants encoding different isoforms have been found.[provided by RefSeq, Aug 2013]
UniProt Comments for CAPZB	F-actin-capping proteins bind in a Ca2+-independent manner to the fast growing ends of actin filaments (barbed end) thereby blocking the exchange of subunits at these ends. Unlike other capping proteins (such as gelsolin and severin), these proteins do not sever actin filaments. Plays a role in the regulation of cell morphology and cytoskeletal organization.
Research Articles on CAPZB	**1.** RAGE has a role in endothelial cell membrane repair and regulates F-actin remodeling and membrane resealing
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.
