MCAF Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	MCAF, Polyclonal Antibody
Full Product Name	MCAF (MCP-1, Macrophage/Monocyte Chemotactic and Activating Factor) (Biotin)
Product Gene Name	anti-MCAF antibody
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human
Form/Format	Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with Biotin.
Purity/Purification	Purified by affinity chromatography.
Specificity	Recognizes MCAF/MCP-1
Preparation and Storage	Store product at 4 degree C if to be used immediately within two weeks. For long-term storage, aliquot to avoid repeated freezing and thawing and store at -20 degree C. Aliquots are stable at -20 degree C for 12 months after receipt. Dilute required amount only prior to immediate use. Further dilutions can be made in assay buffer. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap.
Immunogen	Highly purified (>98%) recombinant human MCP-1.
Conjugate	Biotin
Note	Preservative Free
Special Handling	Hygroscopic. Keep tightly closed and desiccated.
Product Categories/Family for anti-MCAF antibody	Antibodies; Growth Factors; Cytokines
Applications Tested/Suitable for anti-MCAF antibody	ELISA (EIA), Neutralization, Western Blot (WB)
Application Notes for anti-MCAF antibody	ELISA: Detection by direct ELISA (using 100ul/well antibody solution), requires a concentration of at least 0.5ug/ml of antibody. This antigen-affinity purified antibody, in conjunction with compatible secondary reagents, allows detection of 0.2-0.4ng/well. Neutralization: To yield one-half maximal inhibition [ND50] of the biological activity (10ng/ml), a concentration of 3.0-5.0ug/ml of this antibody is required. WB: Use at a concentration of 0.1-0.2ug/ml. Used in conjunction with compatible secondary reagents the detection limit is 1.5-3.0ng/lane, under either reducing or non-reducing conditions. Applications are based on unconjugated antibody.
Related Product Information for anti-MCAF antibody	MBS6487273 is an antibody targeting MCAF. Also known as MCAF (MCP-1, Macrophage/Monocyte Chemotactic and Activating Factor) (Biotin). Reactive in Human. Host: Rabbit.
Other Notes	Small volumes of anti-MCAF antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
