PHLPP Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	PHLPP, Polyclonal Antibody
Full Product Name	PHLPP, NT (PH Domain and Leucine Rich Repeat Protein Phosphatase 1, PH Domain Leucine-rich Repeat-containing Protein Phosphatase 1, PHLPP1, KIAA0606, MGC161555, Pleckstrin Homology Domain-containing Family E Member 1, PH Domain-containing Family E Member
Product Gene Name	anti-PHLPP antibody
Product Synonym Names	EC=3.1.3.16
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human
Form/Format	Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with Biotin.
Purity/Purification	Purified by Ammonium Sulfate Precipitation.
Specificity	Recognizes human PHLPP1.
Preparation and Storage	Store product at 4 degree C if to be used immediately within two weeks. For long-term storage, aliquot to avoid repeated freezing and thawing and store at -20 degree C. Aliquots are stable at -20 degree C for 12 months after receipt. Dilute required amount only prior to immediate use. Further dilutions can be made in assay buffer. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap.
Molecular Weight	189 kDa
OMIM	609396
3D Structure	ModBase 3D Structure for O60346
Immunogen	Synthetic peptide selected from the N-terminal region of human PHLPP1 (KLH).
Conjugate	Biotin
Note	Preservative Free
Product Categories/Family for anti-PHLPP antibody	Antibodies; Tumor Suppressors
Applications Tested/Suitable for anti-PHLPP antibody	Western Blot (WB), ELISA (EIA)
Application Notes for anti-PHLPP antibody	WB: 1:50-1:100 ELISA: 1:1,000 Applications are based on unconjugated antibody.
Related Product Information for anti-PHLPP antibody	MBS6492914 is an antibody targeting PHLPP. Also known as PHLPP, NT (PH Domain and Leucine Rich Repeat Protein Phosphatase 1, PH Domain Leucine-rich Repeat-containing Protein Phosphatase 1, PHLPP1, KIAA0606, MGC161555, Pleckstrin Homology Domain-containing Family E Member 1, PH Domain-containing Family E Member. Reactive in Human. Host: Rabbit.
Product References and Citations for anti-PHLPP antibody	1. Gao, T., J. Biol. Chem. 283(10), 6300-6311 (2008). 2. Brognard, J., Mol. Cell 25(6), 917-931 (2007). 3. Gao, T., Mol. Cell 18(1), 13-24 (2005).

Other Notes	Small volumes of anti-PHLPP antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

Western Blot (WB) of anti-PHLPP antibody
Western blot analysis of anti-PHLPP1 Antibody (N-term) in K562 cell line lysates (35ug/lane).PHLPP1 (arrow) was detected using the purified Pab.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for PHLPP. It may not necessarily be applicable to this product.

NCBI GI #	291219891
NCBI GeneID	23239
NCBI Accession #	NP_919431
UniProt Primary Accession #	O60346
UniProt Secondary Accession #	Q641Q7; Q6P4C4; Q6PJI6; Q86TN6; Q96FK2; Q9NUY1; A1A4F5
UniProt Related Accession #	O60346
GenBank Nucleotide #	NM_194449.3
NCBI Official Full Name	PH domain leucine-rich repeat-containing protein phosphatase 1
NCBI Official Synonym Full Names	PH domain and leucine rich repeat protein phosphatase 1
NCBI Official Symbol	PHLPP1
NCBI Official Synonym Symbols	SCOP; PHLPP; PLEKHE1
UniProt Protein Name	PH domain leucine-rich repeat-containing protein phosphatase 1
UniProt Synonym Protein Names	Pleckstrin homology domain-containing family E member 1; PH domain-containing family E member 1; Suprachiasmatic nucleus circadian oscillatory protein; hSCOP
Protein Family	Protein phosphatase PHLPP-like protein
UniProt Gene Name	PHLPP1
UniProt Synonym Gene Names	KIAA0606; PHLPP; PLEKHE1; SCOP; PH domain-containing family E member 1; hSCOP
UniProt Entry Name	PHLP1_HUMAN
NCBI Protein Information	PH domain leucine-rich repeat-containing protein phosphatase 1; SCN circadian oscillatory protein; PH domain-containing family E member 1; suprachiasmatic nucleus circadian oscillatory protein; pleckstrin homology domain containing, family E (with leucine

NCBI Summary for PHLPP	This gene encodes a member of the serine/threonine phosphatase family. The encoded protein promotes apoptosis by dephosphorylating and inactivating the serine/threonine kinase Akt, and functions as a tumor suppressor in multiple types of cancer. Increased expression of this gene may also play a role in obesity and type 2 diabetes by interfering with Akt-mediated insulin signaling. [provided by RefSeq, Dec 2011]
UniProt Comments for PHLPP	PHLPP: a pleckstrin homology domain leucine-rich repeat protein phosphoserine and Â¿threonine phosphatase. A tumor suppressor that controls the onset and progression of various cancers because it controls the balance between cell survival and apoptosis. Catalyzes the dephosphorylation of the hydrophobic motif on the AGC kinases Akt, PKC, and S6 kinase, and the inhibitory site on the kinase Mst1. The dephosphorylation of PKCA and PKCB is destabilizing, leading to its degradation. The dephosphorylation of p70S6K at T390 reduces its activity, thus reducing the efficiency of protein translation. Dephosphorylation of Mst1 by PHLPP of an autoinhibitory site (T387) activates Mst1, resulting in the activation of the pro-apoptotic MAPK pathway. Ubiquitously expressed in non-cancerous tissues. Insensitive to inhibition by okadaic acid. PHLPP loss occurs at high frequency in colorectal cancer, and leads to the development of prostate tumors in mice. PHLPP degradation by the 26 S proteasome is controlled by a beta-TrCP-containing SkpÂ¿Cullin 1Â¿F-box protein (SCF) complex E3 ubiquitin ligase in a phosphorylation-dependent manner. This degradation requires phosphorylation of PHLPP1 by CK I and GSK-3beta. Activation of the PI3K/Akt pathway suppresses the degradation of PHLPP1 by inhibiting GSK-3beta activity. PHLPP2 activity is highly sensitive to a common polymorphism (L-1016-S) that reduces its rate of dephosphorylation of the hydrophobic motif of Akt and PKC, rendering it ineffective at inducing apoptosis. This variant is expressed by 30% of the human population. Interacts with the nucleotide free form of KRas via its LRR repeats. Interacts with AKT2, AKT3 and PKCB isoform beta-II. Protein type: Tumor suppressor; EC 3.1.3.16; Protein phosphatase, Ser/Thr (non-receptor) Chromosomal Location of Human Ortholog: 18q21.33 Cellular Component: membrane; cytosol; nucleus Molecular Function: protein binding; metal ion binding; phosphoprotein phosphatase activity Biological Process: epidermal growth factor receptor signaling pathway; phosphoinositide-mediated signaling; fibroblast growth factor receptor signaling pathway; nerve growth factor receptor signaling pathway; dephosphorylation; apoptosis; innate immune response; entrainment of circadian clock
Research Articles on PHLPP	**1.** Suppression of PHLPP1 by DNA methylation contributes to melanoma development and progression.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
