AQP1 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	AQP1, Polyclonal Antibody
Full Product Name	AQP1 Antibody
Product Gene Name	anti-AQP1 antibody
Product Synonym Names	AQP1; CHIP28; Aquaporin-1; AQP-1; Aquaporin-CHIP; Urine water channel; Water channel protein for red blood cells and kidney proximal tubule
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human, Mouse, Rat
Form/Format	Liquid; In Phosphate Buffered Saline, 50% Glycerol, 0.5% BSA and 0.02% Sodium Azide.
Purity/Purification	Affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Preparation and Storage	Upon receipt, store at -20 degree C or -80 degree C. Avoid repeated freeze.
Molecular Weight	28,526 Da
Chromosome Location	Chromosome: 7; NC_000007.13 (30951415..30965131). Location: 7p14
OMIM	107776
3D Structure	ModBase 3D Structure for P29972
Immunogen	Synthesized peptide derived from the Internal region of human AQP1.
Immunogen Species	Human
Conjugate	Non-conjugated
Product Categories/Family for anti-AQP1 antibody	Signal Transduction
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Applications Tested/Suitable for anti-AQP1 antibody	Western Blot (WB), ELISA (EIA)
Application Notes for anti-AQP1 antibody	WB: 1:500-1:2000 ELISA: 1:40000
Related Product Information for anti-AQP1 antibody	MBS7119686 is an antibody targeting AQP1. Also known as AQP1 Antibody. Reactive in Human, Mouse, Rat. Host: Rabbit.
Other Notes	Small volumes of anti-AQP1 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for AQP1. It may not necessarily be applicable to this product.

NCBI GI #	297307116

NCBI GeneID	358
NCBI Accession #	NP_001171989.1
UniProt Primary Accession #	P29972
UniProt Secondary Accession #	Q8TBI5; Q8TDC1; B5BU39; F5GY19
UniProt Related Accession #	P29972
GenBank Nucleotide #	NM_001185060.1
NCBI Official Full Name	aquaporin-1 isoform 2
NCBI Official Synonym Full Names	aquaporin 1 (Colton blood group)
NCBI Official Symbol	AQP1
NCBI Official Synonym Symbols	CO; CHIP28; AQP-CHIP
UniProt Protein Name	Aquaporin-1
UniProt Synonym Protein Names	Aquaporin-CHIP; Urine water channel; Water channel protein for red blood cells and kidney proximal tubule
UniProt Gene Name	AQP1
UniProt Synonym Gene Names	CHIP28; AQP-1
UniProt Entry Name	AQP1_HUMAN
NCBI Protein Information	aquaporin-1; aquaporin-CHIP; Colton blood group; urine water channel; channel-like integral membrane protein, 28-kDa; water channel protein for red blood cells and kidney proximal tubule; aquaporin 1 (channel-forming integral protein, 28kDa, CO blood grou
NCBI Summary for AQP1	Aquaporins are a family of small integral membrane proteins related to the major intrinsic protein (MIP or AQP0). This gene encodes an aquaporin which functions as a molecular water channel protein. It is a homotetramer with 6 bilayer spanning domains and N-glycosylation sites. The protein physically resembles channel proteins and is abundant in erythrocytes and renal tubes. The gene encoding this aquaporin is a possible candidate for disorders involving imbalance in ocular fluid movement. Several transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jun 2010]

UniProt Comments for AQP1	AQP1: Forms a water-specific channel that provides the plasma membranes of red cells and kidney proximal tubules with high permeability to water, thereby permitting water to move in the direction of an osmotic gradient. Belongs to the MIP/aquaporin (TC 1.A.8) family. Protein type: Transporter, aquaporin family; Membrane protein, integral; Transporter; Membrane protein, multi-pass Chromosomal Location of Human Ortholog: 7p14 Cellular Component: nuclear membrane; integral to plasma membrane; basolateral plasma membrane; brush border membrane; apical part of cell; apical plasma membrane; cytoplasm; plasma membrane; basal plasma membrane; nerve terminal; nucleus; sarcolemma; brush border Molecular Function: protein binding; ephrin receptor binding; potassium channel activity; water transporter activity; intracellular cGMP activated cation channel activity; ammonium transmembrane transporter activity; glycerol transmembrane transporter activity; potassium ion transmembrane transporter activity; nitric oxide transporter activity; water channel activity; transmembrane transporter activity; glycerol channel activity Biological Process: cGMP biosynthetic process; glycerol transport; cerebrospinal fluid secretion; wound healing; cellular response to stress; water transport; carbon dioxide transport; negative regulation of caspase activity; pancreatic juice secretion; sensory perception of pain; positive regulation of saliva secretion; odontogenesis; positive regulation of fibroblast proliferation; hyperosmotic salinity response; nitric oxide transport; bicarbonate transport; multicellular organismal water homeostasis; cellular homeostasis; transmembrane transport; potassium ion transport; lipid digestion; lateral ventricle development; response to drug; cellular water homeostasis; secretory granule organization and biogenesis; glomerular filtration; ammonium transport; renal water transport; positive regulation of angiogenesis; camera-type eye morphogenesis; adrenocorticotropin hormone secretion; response to estrogen stimulus; establishment and/or maintenance of actin cytoskeleton polarity; renal water homeostasis; cell volume homeostasis; negative regulation of apoptosis Disease: Blood Group--colton
Research Articles on AQP1	**1.** Estrogen induces AQP1 expression by activating ERE in the promoter of the Aqp1 gene, resulting in tubulogenesis of vascular endothelial cells.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
