MMP9 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	MMP9, Polyclonal Antibody
Full Product Name	MMP9 Antibody
Product Gene Name	anti-MMP9 antibody
Product Synonym Names	matrix metallopeptidase 9 (gelatinase B; 92kDa gelatinase; 92kDa type IV collagenase)
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human
Form/Format	Liquid; In Phosphate Buffered Saline, pH 7.4, 0.05% NaN3, and 40% Glycerol
Purity/Purification	Antigen Affinity Purification
Preparation and Storage	Upon receipt, store at -20 degree C or -80 degree C. Avoid repeated freeze.
Molecular Weight	78,458 Da
Chromosome Location	Chromosome: 20; NC_000020.10 (44637547..44645200). Location: 20q11.2-q13.1
OMIM	120361
3D Structure	ModBase 3D Structure for P14780
Immunogen	Synthetic peptide of human MMP9
Immunogen Species	Human
Conjugate	Non-conjugated
Product Categories/Family for anti-MMP9 antibody	Cardiovascular
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Applications Tested/Suitable for anti-MMP9 antibody	ELISA (EIA), Immunohistochemistry (IHC)
Application Notes for anti-MMP9 antibody	ELISA: 1:1000-1:2000 IHC: 1:25-1:100
Related Product Information for anti-MMP9 antibody	MBS7129436 is an antibody targeting MMP9. Also known as MMP9 Antibody. Reactive in Human. Host: Rabbit.
Other Notes	Small volumes of anti-MMP9 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

Immunohistochemistry (IHC)-Paraffin of anti-MMP9 antibody
The image on the left is immunohistochemistry of paraffin-embedded Human colon cancer tissue using MBS7129436(MMP9 Antibody) at dilution 1/30, on the right is treated with synthetic peptide. (Original magnification: ×200)

Immunohistochemistry (IHC)-Paraffin of anti-MMP9 antibody
The image on the left is immunohistochemistry of paraffin-embedded Human gastric cancer tissue using MBS7129436(MMP9 Antibody) at dilution 1/30, on the right is treated with synthetic peptide. (Original magnification: ×200)

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for MMP9. It may not necessarily be applicable to this product.

NCBI GI #	74272287
NCBI GeneID	4318
NCBI Accession #	NP_004985.2
UniProt Primary Accession #	P14780
UniProt Secondary Accession #	Q3LR70; Q8N725; Q9H4Z1; Q9UCJ9; Q9UCL1; Q9UDK2; B2R7V9
UniProt Related Accession #	P14780
GenBank Nucleotide #	NM_004994.2
NCBI Official Full Name	matrix metalloproteinase-9 preproprotein
NCBI Official Synonym Full Names	matrix metallopeptidase 9 (gelatinase B, 92kDa gelatinase, 92kDa type IV collagenase)
NCBI Official Symbol	MMP9
NCBI Official Synonym Symbols	GELB; CLG4B; MMP-9; MANDP2
UniProt Protein Name	Matrix metalloproteinase-9
UniProt Synonym Protein Names	92 kDa gelatinase; 92 kDa type IV collagenase; Gelatinase B
Protein Family	Matrix metalloproteinase
UniProt Gene Name	MMP9
UniProt Synonym Gene Names	CLG4B; MMP-9; GELB
UniProt Entry Name	MMP9_HUMAN
NCBI Protein Information	matrix metalloproteinase-9; 92 kDa gelatinase; type V collagenase; macrophage gelatinase; 92 kDa type IV collagenase; matrix metalloproteinase 9 (gelatinase B, 92kDa gelatinase, 92kDa type IV collagenase)
NCBI Summary for MMP9	Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. Most MMP's are secreted as inactive proproteins which are activated when cleaved by extracellular proteinases. The enzyme encoded by this gene degrades type IV and V collagens. Studies in rhesus monkeys suggest that the enzyme is involved in IL-8-induced mobilization of hematopoietic progenitor cells from bone marrow, and murine studies suggest a role in tumor-associated tissue remodeling. [provided by RefSeq, Jul 2008]

UniProt Comments for MMP9	MMP9: May play an essential role in local proteolysis of the extracellular matrix and in leukocyte migration. Could play a role in bone osteoclastic resorption. Cleaves KiSS1 at a Gly-|-Leu bond. Cleaves type IV and type V collagen into large C-terminal three quarter fragments and shorter N-terminal one quarter fragments. Degrades fibronectin but not laminin or Pz-peptide. Exists as monomer or homodimer; disulfide-linked. Exists also as heterodimer with a 25 kDa protein. Macrophages and transformed cell lines produce only the monomeric form. Interacts with ECM1. Activated by 4-aminophenylmercuric acetate and phorbol ester. Up-regulated by ARHGEF4, SPATA13 and APC via the JNK signaling pathway in colorectal tumor cells. Produced by normal alveolar macrophages and granulocytes. Inhibited by histatin-3 1/24 (histatin-5). Inhibited by ECM1. Belongs to the peptidase M10A family. Protein type: Protease; EC 3.4.24.35; Secreted; Motility/polarity/chemotaxis; Secreted, signal peptide Chromosomal Location of Human Ortholog: 20q13.12 Cellular Component: proteinaceous extracellular matrix; extracellular space; extracellular region Molecular Function: collagen binding; identical protein binding; protein binding; zinc ion binding; metalloendopeptidase activity; endopeptidase activity Biological Process: positive regulation of keratinocyte migration; axon guidance; ossification; extracellular matrix organization and biogenesis; macrophage differentiation; positive regulation of apoptosis; proteolysis; extracellular matrix disassembly; collagen catabolic process; ephrin receptor signaling pathway; skeletal development; leukocyte migration; embryo implantation Disease: Metaphyseal Anadysplasia 2
Research Articles on MMP9	**1.** The consistent and increased intensity of MMP9 expression in Hodgkin/Reed-Sternberg cells make this enzyme a potential target for therapy
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
