ACACA Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	ACACA, Polyclonal Antibody
Full Product Name	ACACA Antibody
Product Gene Name	anti-ACACA antibody
Product Synonym Names	ACC; ACAC; ACC1; ACCA; ACACAD
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human
Form/Format	Liquid; Supplied at 1.0mg/mL In Phosphate Buffered Saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl, 0.02% Sodium Azide and 50% Glycerol.
Purity/Purification	Antibodies were produced by immunizing rabbits with synthetic peptide and KLH conjugates. Antibodies were Purified by affinity-chromatography using epitope-specific peptide.
Preparation and Storage	Upon receipt, store at -20 degree C or -80 degree C. Avoid repeated freeze.
Molecular Weight	265,554 Da
Chromosome Location	Chromosome: 17; NC_000017.10 (35441927..35766902, complement). Location: 17q21
OMIM	200350
3D Structure	ModBase 3D Structure for Q13085
Immunogen	Peptide sequence around aa.78-82(S-M-S-G-L) derived from Human Acetyl CoA Carboxylase.
Immunogen Species	Human
Conjugate	Non-conjugated
Product Categories/Family for anti-ACACA antibody	Cardiovascular
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Applications Tested/Suitable for anti-ACACA antibody	ELISA (EIA), Western Blot (WB)
Application Notes for anti-ACACA antibody	WB: 1:500-1:1000
Related Product Information for anti-ACACA antibody	MBS7130575 is an antibody targeting ACACA. Also known as ACACA Antibody. Reactive in Human. Host: Rabbit.
Other Notes	Small volumes of anti-ACACA antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

Western Blot (WB) of anti-ACACA antibody
Western blot analysis of extracts from 293 and Hela cells using Acetyl CoA Carboxylase Antibody.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for ACACA. It may not necessarily be applicable to this product.

NCBI GI #	38679960
NCBI GeneID	31
NCBI Accession #	NP_942131.1
UniProt Primary Accession #	Q13085
UniProt Secondary Accession #	Q6KEV6; Q6XDA8; Q7Z2G8; Q7Z561; Q7Z563; Q7Z564; Q86WB2; Q86WB3; B2RP68
UniProt Related Accession #	Q13085
GenBank Nucleotide #	NM_198834.1
NCBI Official Full Name	acetyl-CoA carboxylase 1 isoform 1
NCBI Official Synonym Full Names	acetyl-CoA carboxylase alpha
NCBI Official Symbol	ACACA
NCBI Official Synonym Symbols	ACC; ACAC; ACC1; ACCA; ACACAD
UniProt Protein Name	Acetyl-CoA carboxylase 1
UniProt Synonym Protein Names	ACC-alpha
UniProt Gene Name	ACACA
UniProt Synonym Gene Names	ACAC; ACC1; ACCA; ACC1
UniProt Entry Name	ACACA_HUMAN
NCBI Protein Information	acetyl-CoA carboxylase 1; ACC-alpha; acetyl-Coenzyme A carboxylase alpha
NCBI Summary for ACACA	Acetyl-CoA carboxylase (ACC) is a complex multifunctional enzyme system. ACC is a biotin-containing enzyme which catalyzes the carboxylation of acetyl-CoA to malonyl-CoA, the rate-limiting step in fatty acid synthesis. There are two ACC forms, alpha and beta, encoded by two different genes. ACC-alpha is highly enriched in lipogenic tissues. The enzyme is under long term control at the transcriptional and translational levels and under short term regulation by the phosphorylation/dephosphorylation of targeted serine residues and by allosteric transformation by citrate or palmitoyl-CoA. Multiple alternatively spliced transcript variants divergent in the 5' sequence and encoding distinct isoforms have been found for this gene. [provided by RefSeq, Jul 2008]

UniProt Comments for ACACA	ACC1: a subunit of acetyl-CoA carboxylase (ACC), a multifunctional enzyme system. Catalyzes the carboxylation of acetyl-CoA to malonyl-CoA, the rate-limiting step in fatty acid synthesis. Phosphorylation by AMPK or PKA inhibits the enzymatic activity of ACC. ACC-alpha is the predominant isoform in liver, adipocyte and mammary gland. ACC-beta is the major isoform in skeletal muscle and heart. Phosphorylation regulates its activity. Protein type: Ligase; EC 6.3.4.14; EC 6.4.1.2; Carbohydrate Metabolism - propanoate; Carbohydrate Metabolism - pyruvate; Lipid Metabolism - fatty acid biosynthesis Chromosomal Location of Human Ortholog: 17q21 Cellular Component: mitochondrion; cytoplasm; nucleolus; cytosol; actin cytoskeleton Molecular Function: protein binding; acetyl-CoA carboxylase activity; metal ion binding; biotin carboxylase activity; ATP binding Biological Process: vitamin metabolic process; acetyl-CoA metabolic process; multicellular organismal protein metabolic process; tissue homeostasis; positive regulation of cellular metabolic process; energy reserve metabolic process; lipid homeostasis; triacylglycerol biosynthetic process; carnitine shuttle; cellular lipid metabolic process; water-soluble vitamin metabolic process; fatty acid biosynthetic process; biotin metabolic process; protein homotetramerization Disease: Acetyl-coa Carboxylase Deficiency
Research Articles on ACACA	**1.** Exercise training increased AMPKalpha1 activity in older men, however, AMPKalpha2 activity, and the phosphorylation of AMPK, ACC and mTOR, were not affected
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
