NCBI Official Full Name	chromosome partition protein MukB

UniProt Protein Name	Chromosome partition protein MukB
UniProt Synonym Protein Names	Structural maintenance of chromosome-related protein
Protein Family	Chromosome partition protein
UniProt Gene Name	mukB
UniProt Comments for MUKB	Plays a central role in chromosome condensation, segregation and cell cycle progression. Functions as a homodimer, which is essential for chromosome partition. Involved in negative DNA supercoiling in vivo, and by this means organize and compact chromosomes. May achieve or facilitate chromosome segregation by condensation DNA from both sides of a centrally located replisome during cell division.
