Heparin ELISA Kit for Mouse

PRODUCT OVERVIEW

Product Name	Heparin, ELISA Kit
Full Product Name	Mouse Heparin ELISA Kit
Product Gene Name	Heparin elisa kit
Species Reactivity	Mouse
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Sensitivity	1.0 u/l
Preparation and Storage	Store all reagents at 2-8 degree C.
Sample Preparation	We suggest pre-experimenting with neat (undiluted) samples, 1:2 or 1:4 dilutions. Please avoid diluting your samples more than 1:10 as it would exceed the dilution limit set for this kit. If the expected concentration of the target is beyond the detection range of the kit, please contact our technical support team
Intended Uses	This Heparin ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse Heparin. This ELISA kit for research use only, not for therapeutic applications!
ISO Certification	Manufactured in an ISO 13485:2016 Certified Laboratory.
Related Product Information for Heparin elisa kit	**Principle of the assay:** This Heparin ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse Heparin. This ELISA kit for research use only!
Other Notes	Small volumes of Heparin elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for Heparin purchase	MBS729430 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Heparin, ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing Heparin. The ELISA analytical biochemical technique of the MBS729430 kit is based on Heparin antibody-Heparin antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect Heparin antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, Heparin. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).

Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.
