|---|---|
| **Product Name** | Jun B Proto Oncogene (JUNB), ELISA Kit |
| **Full Product Name** | Duck Jun B Proto Oncogene ELISA Kit |
| **Product Gene Name** | JUNB elisa kit |
| **Species Reactivity** | Duck |
| **Preparation and Storage** | Store all reagents at 2-8 degree C |
| **Related Product Information for JUNB elisa kit** | MBS073233 is a ready-to-use microwell, strip-or-full plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Jun B Proto Oncogene (JUNB) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing JUNB. The ELISA analytical biochemical technique of the MBS073233 kit is based on JUNB antibody-JUNB antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect JUNB antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, JUNB. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%). |
| **Other Notes** | Small volumes of JUNB elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply. |
