Complement Fragment 4d (C4D) ELISA Kit for Human

PRODUCT OVERVIEW

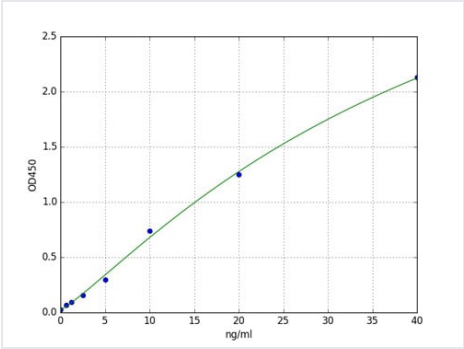

Product Name	Complement Fragment 4d (C4d), ELISA Kit
Full Product Name	Human Complement Fragment 4d ELISA Kit
Product Gene Name	C4d elisa kit
Product Synonym Names	C4d
Species Reactivity	Human
Assay Type	Sandwich ELISA, Double Antibody
Samples	Serum, Plasma, Cell Culture Supernatant, cell or tissue lysate, Other liquid samples
Detection Range	0.625-40ng/ml
Sensitivity	0.375ng/ml
Preparation and Storage	Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C
ISO Certification	Manufactured in an ISO 13485:2003 and EN ISO 13485:2012 Certified Laboratory.
Related Product Information for C4d elisa kit	Principle of the Assay||This kit was based on sandwich enzyme-linked immune-sorbent assay technology. anti-Human C4d antibody was pre-coated onto 96-well plates. And the biotin conjugated anti-Human C4d antibody was used as detection antibodies. The standards, test samples and biotin conjugated detection antibody were added to the wells subsequently, and wash with wash buffer. HRP-Streptavidin was added and unbound conjugates were washed away with wash buffer. TMB substrates were used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the Human C4d amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of Human C4d can be calculated.
Other Notes	Small volumes of C4d elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for C4d purchase	MBS761451 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Complement Fragment 4d (C4d) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing C4d. The ELISA analytical biochemical technique of the MBS761451 kit is based on C4d antibody-C4d antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect C4d antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, C4d. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).

Typical Data & Standard Curve

Results of a typical standard run of a Human C4d ELISA Kit are shown below. This standard curve was generated at our lab for demonstration purpose only. Each user should obtain their own standard curve as per experiment. (N/A=not applicable)

X	ng/ml	0	0.625	1.25	2.5	5	10	20	40
Y	OD450	0.019	0.162	0.290	0.535	0.982	1.419	1.748	2.018

Typical Testing Data of C4d elisa kit

Typical Standard Curve of C4d elisa kit

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
