VCA (EBV-BLRF2) EBV Recombinant Protein

PRODUCT OVERVIEW

Product Name	VCA (EBV-BLRF2), Recombinant Protein
Full Product Name	Recombinant Epstein-Barr Virus VCA (P23) Antigen
Product Gene Name	EBV-BLRF2 recombinant protein
Product Synonym Names	Recombinant Epstein-Barr Virus VCA (P23) Antigen
Host	E coli
Species Reactivity	EBV
Form/Format	Lyophilized from sterile 20 mM Tris, 300 mM NaCl, 200 mM Arg, pH 7.4. Normally 5%-8% trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization.
Purity/Purification	>= 90% as determined by SDS-PAGE.
Preparation and Storage	Samples are stable for up to twelve months from date of receipt at -20 degree C to -80 degree C. Store it under sterile conditions at -20 degree C to -80 degree C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. In general, recombinant proteins are provided as lyophilized powder which are shipped at ambient temperature. Bulk packages of recombinant proteins are provided as frozen liquid. They are shipped out with blue ice unless customers require otherwise.
Molecular Weight	The recombinant Epstein-Barr Virus VCA (P23) Antigen consisting of 168 amino acids and has a calculated molecular mass of 18.5 kDa.
Predicted N Terminal	Met
Related Product Information for EBV-BLRF2 recombinant protein	MBS8126005 is a recombinant protein targeting EBV-BLRF2. Also known as Recombinant Epstein-Barr Virus VCA (P23) Antigen. Reactive in EBV. Host: E coli.
Other Notes	Small volumes of EBV-BLRF2 recombinant protein vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

Testing Data of EBV-BLRF2 recombinant protein

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for EBV-BLRF2. It may not necessarily be applicable to this product.

Protein Family	Calcium-activated potassium channel

Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
